Installation Diagram

Installation in a Recess or Closet

- 1 A dryer installed in a bedroom, bathroom, recess or closet, MUST be exhausted outdoors.
- 2 No other fuel burning appliance shall be installed in the same closet as the gas dryer.
- 3 Your dryer needs the space around it for proper ventilation.

DO NOT install your dryer in a closet with a solid door.

- 4 Closet door ventilation required: A minimum of 120 square inches (774.2 cm²) of opening, equally divided at the top and bottom of the door, is required. Openings should be located 3 inches (7.6 cm) from bottom and top of door. Openings are required to be unobstructed when a door is installed. A louvered door with equivalent air openings for the full length of the door is acceptable.
