

MOUNTING INSTRUCTIONS

Tools Required: Drill, pencil, screwdriver.

(Use Template printed on box as mounting guide)

1. After positioning template on wall, with a nail mark location of mounting screws. (On tile walls- use tile anchors- not provided.)

2. Unscrew set screws at base of back plate and remove mounting brackets.

3. Drill $5/16$ pilot holes and push in anchors until flush with wall surface. Insert Red key into the anchor until it pops open. Fasten mounting brackets to wall with mounting screws. (Fig. 1)

4. Place back plates over brackets and tighten set screws.

5. If necessary loosen wall mounting screws and adjust bracket to obtain the proper horizontal alignment on wall.

Retighten mounting screws and remount back plates to finish.
