

# LED TAPE

## Step by Step Component Guide

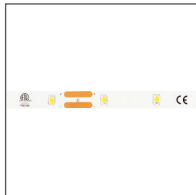

GENERATION  
LIGHTING

LED tape is an incredibly versatile and long-lasting product that can be used in a wide range of applications where space may be limited such as under cabinets, cove ceilings, toe kicks, in cabinets, or even in drawers. Its low profile design and flexibility allow for discrete installation.

### 1 CHOOSE YOUR TAPE

At 200 lumens per foot, Jane 200 features high quality LED diodes that meet a stringent three step binning process for maintaining a consistent color of light across an entire run.

2700k

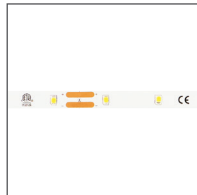

Jane 200 2700k

**900006-15** 10' tape

**900004-15** 40' tape

3000k

Jane 200 3000k

**900007-15** 10' tape

**900005-15** 40' tape

### 2 SELECT CONNECTORS

Cord with fold-over clasps on either end for quick and secure connections between two pieces of Jane 200 tape.

#### ORDER THIS POWER CORD:

**905000-15**  
Jane Power Cord

For connecting Jane LED Tape to a 24v DC transformer. Cord has bare leads on one end for easy wiring to the transformer and a fold-over clasp on the other for a quick, secure connection to the LED tape. Length is 96".

### 3 SELECT A TRANSFORMER

Transformers allow you to connect power to your LED tape system. Choose based on your run length of tape.
