

Assembly Instructions: 5140-3P LG (Hayworth)

IMPORTANT:

- ALL INSTALLATION WORK SHOULD BE DONE BY ACCREDITED PROFESSIONAL.
- SHUT OFF POWER SUPPLY AT FUSE OR CIRCUIT BREAKER!
- USE ONLY THE SPECIFIED BULBS. DO NOT EXCEED THE MAXIMUM WATTAGE!

For Customer Service, contact the place of purchase to arrange for replacement parts.

PREPARING FOR INSTALLATION

Carefully remove all of the contents from the carton. See the important notes above. Shut off the power at the circuit breaker and completely remove the old fixture from the ceiling, including the old mounting strap. From the parts bag, remove the mounting strap assembly. One end of nipple (F) should be attached to mounting strap (A) with washer and hex nut (C & D) in place. The other end should have canopy loop (H) attached.

Attach mounting strap (A) to the junction box using mounting screws (B) and a screwdriver. Tighten securely. Unscrew canopy loop collar (I) from canopy loop (H). Pass canopy (G) over the mounted canopy loop to test the height. Approximately half of the canopy loop's exterior threads should be exposed, and the canopy loop collar should fit snugly onto the canopy loop. Remove canopy (G) and adjust the height of nipple (F) and canopy loop (H) until the desired height is reached. Remove the canopy loop collar and canopy and place to the side.

ASSEMBLING THE FIXTURE

Top loop (L) is on the wires, but not attached. Pull the wires until taut, then tighten top loop (L) onto the threads of post (M). By measuring, determine the correct length of chain needed for proper hanging height. If necessary, use a pair of pliers to open and remove any excess chain. Attach one of chain connectors (K) to chain (J). Attach one end of chain connector (K) to top loop (L) and close chain connector (K). Feed the fixture's wires up through the chain (every three links or so), pulling the wires until taut. Use the free chain connector (K) to attach chain (J) to canopy loop (H). Slide canopy loop collar (I) then canopy (G) down onto the chain/wires. Pull the wires until taut. Trim the wires to the desired length plus 8 to 10 inches.

CONNECTING THE WIRES

Have an assistant support the weight of the fixture while completing the wiring. Attach the fixture's wires to the power supply wires from the junction box. Connect black to black (or smooth); white to white (or ribbed); ground to ground (green or copper). Twist the ends of the wire pairs together, then twist on a wire connector. Make sure all twists are in the same direction. If there is no ground wire (green or copper) from the junction box, locate ground screw (E) on mounting strap (A) and wrap the fixture's ground wire around the green ground screw (E). Use a screwdriver to secure ground screw (E) onto mounting strap (A). Tuck all wires neatly into the junction box.

FINISHING THE INSTALLATION

Push canopy (G) up to the ceiling and slide canopy loop collar (I) up beneath the canopy. Tightly thread canopy loop collar (I) onto canopy loop (H) to secure canopy (G) in place. Twist nipple (R) into connector (Q). Place shade (P) against metal plate (N) and secure in place by screwing decorative nuts (O) onto the threaded posts.

Install light bulbs (not provided) in accordance with the fixture's specifications. Do not exceed the maximum recommended wattage.

Push diffuser (S) up to the bottom of shade (P) and over nipple (R). Secure the diffuser in place by threading on rubber spacers (T) and (U), followed by hex nut (V). Finally, thread bottom cap (W) and decorative cap (X) onto the exposed threads of nipple (R).

Your installation is now complete. Turn on the power and test the fixture.

CLEANING TIPS

Treat the fixture gently! Regular cleaning will reduce the need for deep cleaning. For regular cleaning, turn off the light and wipe down the fixture with a clean lint-free cotton or microfiber cloth. Never spray cleaner directly onto the fixture.
