

# EASY.

Loox. The intelligent system with plug-and-play color coding.

Zoom View

Loox is available in three power systems with matching drivers as central switching devices to create different lighting effects. Universal applications ranging from ambient light to functional light — both with different light outputs — are available in 12 V and 24 V. The 350 mA option is specially designed for spot lighting with low wattage. No matter which system you choose, clear color coding makes Loox easy to assemble and install by anyone.
