

# Aktiva™ Showerhead

## 27470 with arm

## 28490 showerhead only

Available in chrome, chrome/gold, satin chrome, and polished brass  
28490 also available in white

## Product Specifications

Flow rate: 2.5 GPM

Due to the weight of this showerhead, it should be used only with the arm included, or with the 27431 Large Cast Shower Arm. The 28490 can be used in a ceiling installation provided that a properly anchored male threaded pipe fitting is used. Damage caused by improper installation is not covered by the Hansgrohe warranty.

This is a special purpose showerhead. We recommend that it be used only with a dedicated Hansgrohe 3/4" thermostatic mixing valve and a 3/4" volume control valve.
