

## FEATURES & BENEFITS

### DESIGN

With its patented push-button design which allows for front access stream adjustment as well as cartridge and strainer access, this valve offers the ultimate in ease of maintenance.

### VALVE

The push-button activated valve offers the only all stainless steel valve body that is machined out of solid bar stock, is fully serviceable through the front of the push button assembly offering access to the water control cartridge and integral water supply strainer, and with front access to the water stream height adjustment for easy maintenance without having to remove the valve. Operating pressure range of 30 to 90 psi (2.1 to 6.2 bar).

### PUSH BUTTON

All chrome plated brass push button resists vandalism by allowing it to spin without unscrewing.

## OPTIONS

- Valve Repair Kit: Model VRK5874, valve repair kit for Model 5874.

## SPECIFICATIONS

Model 5874PB push-button activated fountain valve is the only all stainless steel valve body that is machined out of solid bar stock, is fully serviceable through the front of the push button assembly offering access to the water control cartridge and integral water supply strainer, and with front access to the water stream height adjustment for easy maintenance without having to remove the valve. Operating pressure range of 30 to 90 psi (2.1 to 6.2 bar).

## APPLICATIONS

Specifically, this type of valve/button assembly is used as a replacement valve for many Haws fountains, whether it is to replace an existing 5874 valve or to change out the older style 5872 valve assembly. Haws manufactures drinking fountains, faucets and electric water coolers to be lead-free by all known definitions including NSF/ANSI/CAN 61- Section 9, NSF/ANSI/CAN 372, California Proposition 65, and the Federal Safe Drinking Water Act. Product is compliant to California Health and Safety Code 116875 (AB 1953-2006), and NSF/ANSI/CAN 61: Q ≤ 0.5.
