CONFIGURATIONS

Your new Hestan Refreshment Center / Insulated Sink is offered in 4 different configurations, as well as a separate Ice Bin accessory. INSTALLATION

EN

1. Consult the end of this instruction manual to determine the appropriate cutout dimensions for your product. The Hestan Refreshment Center / Insulated Sink is designed for outdoor use and features corrosion-resistant stainless steel construction. The faucet (GRC & GRCHS models) is also made of stainless steel and is outdoor-rated.

Some provision must be made in the island for fresh water supply and proper drainage of the sink. It is recommended that the product be installed by a qualified technician or plumber in accordance with all local building and plumbing codes.

As seen in this typical installation, Hestan Access Doors are mounted underneath the Refreshment Center & Ice Bin to allow access to the plumbing underneath. This is not a requirement and your professional outdoor equipment designer or installer may find another way to access this area.

2. Installation instructions for the faucet are packed in the carton with the faucet itself. It may be easier to mount the faucet before installing the sink. The large 3-1/2" hole in the sink can accommodate a standard basket strainer (not included), or a food-waste disposer (not included). Your qualified technician or plumber should install this item before mounting the sink.

3. If your unit includes a high shelf, install it and secure with 2 hex bolts from underneath, and 2 screws on either side. Carefully lower the sink into the cutout of your island countertop. Push the sink into position and apply a small bead of clear silicone sealant around the perimeter of the outer frame to your countertop. Your qualified technician or plumber may now assemble the water and drain connections in accordance with local codes. In the absence of local codes, the Uniform Plumbing Code should be followed.
4. Installation of the remaining components are detailed in the image below.
