Non-abrasive cleaner	<ul style="list-style-type: none"> <li>Will not scratch tub surface</li> </ul>

## INSTRUCTIONS FOR USE

**DO NOT USE WHILE BATHING!**  
**CONTAINS STRONG CLEANING AGENTS**

**IMMEDIATELY AFTER** bathing and exiting the whirlpool bath, leave the bath water in the tub and add more hot water. The water level in the tub must be at least 2" above the highest jet.

**STEP 1:** Turn on the whirlpool air control to the lowest setting and pour in the entire contents of **PACKET #1** directly into the bath water. For best results, pour the Systems Clean™ content into the tub near the intake for the circulation pump and be sure to avoid contact with your skin.

**STEP 2:** Allow the whirlpool to run for 30 seconds and then add **PACKET #2**. **It is important to use packet #1 before packet #2 to avoid a strong odor.** Allow the bath to run for 5 to 10 minutes then drain the tub completely. Refill the tub with cold water and allow system to run for 2 to 3 minutes. Drain completely and rinse off any residue.

**REFER TO PACKAGE FOR FIRST AID INFORMATION.**
