Columbia Series Vanities: 983-72-AGR 983-V72-GW 983-V72-LTO Columbia Series Metal Bases (sold separately): 983-B72-GLD 983-72MBK 983-72-BNK

# Assembly/Installation Instructions

For your safety and to achieve the best possible installation of this cabinet, James Martin Vanities always recommends you consult with a professional contractor. Two people are required for the assembly and installation of these cabinets.

Important Notes: This vanity cabinet may be used freestanding, or may be mounted to a wall (floating). If you are using this cabinet as a freestanding unit with the stainless steel base, please follow the instructions on pages 06 - 11 \*.

If you are using this cabinet as a wall mounted (floating) unit, please refer to pages 01 - 05 \* . Door Pulls: The door pulls will ship in a separate carton

Wood Shelves:

The wood shelves used on the optional metal base (purchased separately), are included with another separate package.

A pre-attached metal mounting (French Cleat) brackets

## Step 1 Notes:

The metal mounting brackets have been pre-installed to the backside of the cabinet 11 1/4" from the bottom of the cabinet, remove one piece from the back of the cabinet.

### Step 2 Notes:

Draw a horizontal line on the wall at your desired height. For this cabinet, most people use a height of 26 3/4"

Columbia Series Vanities: 983-V72-AGR 983-V72-GW 983-V72-LTO Columbia Series Metal Bases: 983-B72-GLD 983-B72-MBK 983-B72-BNK

## Assembly/Installation Instructions

### Step 3 Notes:

Locate and mark the position of the wall's interior studs to which you will fasten the metal bracket. We recommend the use of an electronic stud finder to locate the studs.

(Alternately, you may find studs by listening for a solid sound as you knock on the wall)

### Special Note 1:

If the studs in your bathroom do not line up to the mounting location for your vanity, additional wood blocking can be installed between the studs using standard 2 x 4 lumber.

### Special Note 2:

The bracket must be installed into 4 studs or wood blocking. The remaining screws should be secured into drywall using the anchors provided.

#### **IMPORTANT:**

James Martin Vanities recommended you always consult with professional installers and contractors regarding the correct installation of our products. Page: 3 of 11

## Assembly/Installation Instructions

### Step 4 Notes:

After you have located the wall studs, position the metal bracket so the holes align with the center points of the studs. Mark these positions with a pencil.

### Step 5 Notes:

Drill holes for the screws in the positions you have marked with the pencil. Drill the holes' deepth no less than 1 1/2<sup>°</sup>, insert "C" to the holes by using hammer.

## Assembly/Installation Instructions

### Step 3b Notes:

Place the vanity cabinet upside down on a blanket or other soft material, to prevent scratching.

### Step 4b Notes:

Attach the metal bolts (J) to the bottom of the vanity cabinet. Secure the bolts by turning the Allen Wrench (E)

E = 1 PC Allen Wrench (#4)

J =8PCS Bolts 1/4 x 1 1/2"

### Step 5b Notes:

Once the metal base has been safely and securely attached to the vanity cabinet, you may return the cabinet to the upright position.
