Е	IMPORTANT: Cabinet and countertop depths are determined by the cooking appliances to be used with this downdraft vent system.		

LOCATION REQUIREMENTS

Cabinet and countertop depth requirements may be deeper than 38" (96.5 cm). This is determined by the cooking appliances being installed with this downdraft vent system.

ELECTRICAL REQUIREMENTS

120 volt, 60 Hz, AC only, 15-amp fused, electrical circuit is required.

VENTING REQUIREMENTS

The vent is factory set for a 10" diameter (25.4 cm) vent system venting through the wall or floor. Do not terminate the vent in an attic or other enclosed area.
