Notes

The Envisage LED Lit "Vanity" Mirrors are manufactured with a copper-free process which provides excellent resistance to humidity and corrosion. They provide abundant white light at very low wattage with long maintenance free operating lives. Special diffusion and glazing of the glass makes light output more effective, optimizing viewer comfort. Light placement behind the mirror provides ease of cleaning and eliminates damage typical to exposed light sources. The visually appealing geometric designs of these mirrors add value to any interior décor. The mirrors also provide high functionality, flattering visual clarity and make a lasting design statement. Mirrors are ADA compliant and may be mounted vertically or horizontally. The BLML-212 LED Lit mirror displays a rectangular cut-out.
