Justice Design Group

Installation Instructions | Flush Mount ceiling fixtures

## IMPORTANT
- Justice Design recommends that a licensed electrician install this lighting fixture
- Installation must comply with all building, safety, and electrical codes and requirements
- Disconnect power to the junction box prior to installation
- Do not reconnect power until this fixture is properly installed
- This fixture is designed to mount to a standard metal 4-0 octagonal junction box
- For outdoor use the junction box must be contained within a "covered ceiling" as specified by Underwriters Laboratory and local building codes. Contact your local building inspector if you have questions.
- Fixture must be sealed to mounting surface using high-quality 20-year silicone. Approximately 2 fluid ounces of silicone will be required per fixture.
- Prepare surface for silicone adhesive according to silicone manufacturer's directions.
- Mounting surface must be clean and flat. Shingles and heavy relief textures such as stone surfaces must be modified to insure a waterproof seal.
- Bisque (unfinished) fixtures must be painted with high quality exterior grade paint and allowed to dry thoroughly prior to installation. (See enclosed painting instructions for details.)

HARDWARE PACK

A.

B.

C.

D.

Hardware Pack contains:

A. 2 - 1 3/4" long 8/32 All-Thread Posts
B. 2 - Finials
C. 2 - 3/4" long 8/32 Screws
D. 1 - Universal Mounting Ring

---

1

Screw two (2) All-Thread Posts into outer pair of holes in Universal Mounting Ring. Leave enough length to insure All-Thread Posts will protrude through canopy of fixture.

Flush Mount ceiling fixtures

2

Pull fixture wires through center hole of Universal Mounting Ring. Connect fixture wires to supply wires using wire nuts (not included). Observe polarity: black to power, white to neutral, and bare copper to green ground.

3

Tuck wires and wire nuts into junction box. Secure Universal Mounting Ring to junction box using two (2) 8/32 Screws.

4

Attach fixture to Universal Mounting Ring by placing fixture onto two (2) All-Thread Posts. Secure fixture with two (2) Finials. Be careful not to overtighten Finials or you may damage fixture.
