

Plus:
• 3/16" Masonry Bit
(For Concrete Installation)

			S T	(For Concrete Installation) Gealant ape
Record your model number below for future reference:	CAUTION: Risk of personal injury.  Do not use this product as a grab or support bar when entering or exiting the bath. The product is not designed to support weight.	NOTICE: Adequate floor support is required. Standard 2x6 lumber is NOT sufficient for this application. Concrete can be used as the floor support. Follow all local plumbing and building codes.	1 Roughing-In  3-5/16" (84 mm)  26-3/4" (679 mm)  2-5/16" (59 mm) Min 3" (76 mm) Max  Floor Joist 6" (152 mm) Min	2 Roughing-In  9-5/16" 7-7/8" (200 mm) Min  3-3/8" (846 mm) Min  Finished Wall  Finished Floor  (51 mm) Min  Wood Support 6" (152 mm) Min Width  Floor  Floor  Floor  G" (152 mm) Min Width  Floor  Floor  Floor  Floor  Floor  Floor  G" (152 mm) Min Width  Floor  Floor
3 Construct a wood support under the floor according to the roughing-in dimensions.	4 Use the base to mark the mounting holes on the wood support.	Using a 3/16" drill bit (provided), drill 1-1/2" (38 mm) deep holes at the marked locations. For a concrete base, use a 3/16" masonry bit.	Secure the base to the support with the screws and washers.	<b>7</b> Apply sealant tape to the supply pipes and thread into the base. The cold supply goes over the notch.
		Ø 3/16"  1-1/2" (38 mm)		Cold
8 Insert the plug into the base. Turn on the water and check for leaks.	9 Turn off the water and secure the guard onto the base.	10 Finish the floor, leaving a 3" (76 mm) hole for the guard.  Finished Floor	11 Cut the guard flush with the finished floor.	12 Remove the plug from the base.
