

			Q)	Sealant Tape
Record your model number.	CAUTION: Risk of personal injury. Do not use this product as a grab or support bar when entering or exiting the bath. The product is not designed to support weight.	NOTICE: Adequate floor support is required. Standard 2x6 lumber is NOT sufficient for this application. NOTE: Concrete can be used as the floor support. Observe all local plumbing and building codes.	Roughing-In 3-5/16" (84 mm) 22-7/8" (581 mm) Min 23-5/8" (600 mm) Max 2-1/4" (57 mm) Min 3" (76 mm) Max Floor Joist 6" (152 mm) Min	2 Roughing-In 8-1/2" (216 mm) (200 mm) Min 3-3/8" (86 mm) Min 33-13/16" (859 mm) Max Finished Floor Floor 6" (152 mm) Min Width
3 Construct a wood support under the floor according to the roughing-in dimensions.	4 Use the base to mark the mounting holes on the wood support.	5 Using a 3/16" drill bit (provided), drill 1-1/2" (38 mm) deep holes at the marked locations. Use a masonry bit if drilling into concrete.	Secure the base to the support with the screws and washers.	7 Apply sealant tape to the supply pipes and thread into the base. The cold supply goes over the notch.
		Ø 3/16" 1-1/2" (38 mm)		Cold
8 Insert the plug into the base. Turn on the water and check for leaks.	9 Turn off the water and secure the guard onto the base.	10 Finish the floor, leaving a 3" (76 mm) diameter hole for the guard.	11 Cut the guard flush with the finished floor.	12 Remove the plug from the base.
		Finished Floor Ø 3" (76 mm)		
13 Secure the faucet to the base with the screws and washers.	14 Install the check valve and handshower hose to the diverter.	15 Divert water to the hose and turn on water to remove debris from the hose.	16 Install the handshower to the hose.	17 Remove the aerator and divert water back to the spout. Run water to remove debris. Reinstall aerator.
