Heater: 240 V, 17 A, 50/60 Hz, 4000 W

Pump speed: Variable

Notes

Measure your actual product for rough-in details. Install this product according to the installation instructions.

The hot water supply should be 70% of the capacity of the bath or greater. Installations will vary.

Consult local and national codes for minimum air gap requirements when installing a spout on the faucet deck other than that supplied.
