K-2974-K	1/2″ volume control valve - for use on bath and shower outlets	❏ NA
K-2977-K	3/4″ volume control valve - for use on bath and shower outlets	❏ NA
Optional Accessories		
K-9663	Twin ell - for use with diverter bath spouts only	❏ NA

Product Specification

The thermostatic mixer less volume control shall have a forged brass valve body. Product shall feature single-handle temperature control, high-flow valving, high-temperature limit stop for added safety, and temperature-balancing mechanism. Product shall feature integral stops, crossflow prevention, filter screens, and scald hazard prevention. Product shall have 3/4″ NPT connections. Product shall have two outlets, the bottom one for bath and the top one for shower. The thermostatic mixer shall be Kohler Model K-2975-KS-NA and the required volume control valve shall be K-_____-K-NA.

MASTERSHOWER®

Installation Notes

Install this product according to the installation guide.

The K-2975-KS thermostatic mixer valve requires a separate volume control valve, K-2974-K or K-2977-K, for each bath and/or shower outlet.

For bath-only or shower-only installations, an NPT plug must be installed in any unused outlet.

The lower port of the thermostatic mixer is intended for use with a bath spout only. If a bath spout is not used with this product, the lower port must be plugged.

For installations with a diverter spout, a twin ell, K-9663, is required between the valve and the spout. It is acceptable for the supply to the K-9663 twin ell to run from the top or bottom port through the volume control valve if the remaining unused port is plugged.
