

INSTALLATION INSTRUCTIONS

Item#P5863 (New. 03/03/2011)

READ AND SAVE THESE INSTRUCTIONS

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

MOUNTING THE FIXTURE (Fig.1)

1. Shut off the power at the circuit breaker and remove the old fixture, including the mounting hardware.
2. Carefully remove the fixture from the carton and check that all parts are included as shown in the illustration.
3. Attach the mounting plate (A) to the junction box using the junction box screws (B). The side of the mounting plate marked "GND" must face out.

CONNECTING THE WIRES (Fig. 2)

4. At this point, connect the electrical wires as shown in Fig. 2, making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the mounting plate using the green screw provided. After wires are connected, tuck them carefully inside the junction box.

FINISHING THE INSTALLATION (Fig.1)

5. Place fixture body (D) over mounting plate (A) and fasten with screws (C).
6. Install the 3*75W E11 Xenon bulb (J) (included) in accordance with the fixture's specifications. **(DO NOT EXCEED THE MAXIMUM WATTAGE RATING!)**
7. Carefully place the glass shade (E) and metal spacer (F) over the socket and bulb, and secure with screw shell (G) with tool (I) provided.

Your installation is now complete. Return power and test the fixture.

Note: Illustration (Fig.1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.

IMPORTANT: FIXTURE SHOULD BE INSTALLED BY A QUALIFIED ELECTRICIAN TO ENSURE PROPER WIRING AND INSTALLATION.
