1.2

Fusion Jack™

GENERAL PRODUCT INFORMATION:

This product is ETL listed and suitable only for indoor dry locations and approved for use at any height above the finished floor.

Adjust the Fixture Height

- 1** Feed the fixture coaxial cable through the glass shade. Slide the glass shade down the cord and rest it onto the socket assembly.
- 2** Cut the coaxial cable to the desired length with a sharp cutter. The overall fixture height is measured from bottom of the glass shade to end of the coaxial cable.

- 3** Insert the fixture coaxial cable through the conical connector.

- 4** Insert the coaxial cable through the flared end of the strain relief.

- 5 Slide the outer wrapped wire back to expose the inner wire.

- 6 Strip 1/8" from end of the inner wire. **Make sure that the stripped portion is not greater than 3/16".**
- 7 Loosen (**Do Not Remove**) the M4 set screw with the provided 2MM Allen wrench.
- 8 Remove the M3 set screw with the provided 1.5MM Allen wrench.

- 9 While inserting the inner wire into the connector look through the set screw hole to make sure that the stripped portion of the inner wire contacts end of the connector.
- 10 Hold the coaxial cable in place; replace and tighten the M3 set screw with the 1.5MM Allen wrench. **Lightly** tug on the coaxial cable to make sure that the set screw connection is tight.

- 11 The strain relief slots should be rotated 90° away from the M4 set screw.
- 12 Slide and push the strain relief completely into the connector. This will force the outer wrapped wire to be inserted into the connector.
- 13 Tighten the M4 set screw with the 2MM Allen wrench so that the strain relief holds the outer wrapped wire in place.

- 14 Slide the conical connector over the fixture connector. To install the fixture, refer to the instructions provided with the system.

Install the Lamp

NOTE: To reduce the risk of a burn or electric shock during relamping, disconnect the power to the fixture.

1 Lift the glass shade up to expose the socket.

NOTE: Use only your fingers and soft cloth to replace the lamp.

Use **MAX 35 Watt**, Type Xelogen (Xenon) Bi-Pin Lamp.

2 Push the lamp pins completely into the socket holes.

WARNING: RISK OF FIRE
Never replace a Xenon (Xelogen) lamp with a regular Halogen lamp. A regular Halogen lamp requires a protective glass shield.

3 Lower the glass shade onto the socket assembly.
