

Legrand LED Advanced Dimmers

Limitless Lighting Control

Perfectly illuminate any space with the Legrand line of LED advanced dimmers from the TradeMaster®, radiant® and adorne® Collections. Engineered with advanced circuitry to provide flicker-free control of today's dimmable LED light bulbs and fixtures, these dimmers are designed to work right out of the box in both new and older homes, no neutral required. A simple and fast installation allows users to optimize the dimmer to adapt to virtually any LED, offering full range adjustability.

Give your clients the power of limitless lighting controls at their fingertips with the Legrand LED Advanced Dimmers.

Compatible with LED bulbs and fixtures.

Specifically designed for use with forward-phase dimmable LED bulbs and fixtures up to 150W at 120VAC.*

High- and low-end dimming range adjustability.

Simple tool-free adjustment to precisely set the dimming range limits, while eliminating LED flicker and turn-on delays.

LED burst mode.

Includes an LED burst mode setting that can be used to eliminate or reduce LED turn-on delays and popcorning.

Advanced circuitry.

Optimized to work right out of the box and provide flicker-free control of LEDs, while reducing callbacks to a jobsite.

User-friendly 2-wire installation.

Installs easily in any single-pole or 3-way switch or dimmer location in less than 15 minutes and does not require a neutral wire.

Easily accessible QR code.

QR code is conveniently located on the front face of the device for easy access to installation resources and troubleshooting information.

Smooth dimming experience.

On/off preset controls, and a separate ergonomic slider allows for precise adjustment of light levels.

Light settings saved in case of power outage.

Constant memory feature returns light levels and user adjustments to return to previous settings following a power failure or outage.

**Not intended for use with 0-10V, MLV, ELV drivers*
