NOTES			“0” in a cell indicates available; “X” indicates not available; “-” indicates not applicable.																		
			IDUs shown compatible with wired Premium Remote Controller (column E) are compatible with all LG wired controllers.																		
			Some IDUs have a control wire terminal block to connect a wired controller with field supplied control cable instead of the LG control cable (with Molex connection). See IDU engineering manual or installation manual for details.																		
			1. Smart AC Wi-Fi module is applicable for models produced after Nov 2015 (serial number 511***** or later)																		
			2. Emergency Heat function is not available with Aux Heat Relay Kit																		
			3. Aux Heat Relay Kit is applicable for models produced after June 2014
