If the sink cabinet has a bottom panel, drill a 2 1/2" (6.4 cm) hole in the panel to connect the water hoses and electrical under the sink.

Si le meuble sous l'évier est doté d'un panneau inférieur, percez un orifice de 2 1/2 po (6.4 cm) dans le panneau pour raccorder les tuyaux d'eau et le câble électrique sous l'évier.

Si el gabinete del lavabo tiene un panel inferior, perfora un agujero de 2 1/2" (6.4 cm) en el panel para conectar las mangueras de agua y el cable eléctrico debajo del mismo.

Kinked / damaged hoses or poor performance will result if these instructions are not followed
Le non-respect de ces instructions entraînera un pincement ou une détérioration des tuyaux ou une faible performance.
De no seguir estas instrucciones al pie de la letra, las mangueras podrían doblarse / dañarse u obtenerse un rendimiento deficiente.

Place this edge against the **FLOOR**
 Mettez ce côté contre le **PLANCHER**
 Coloque este margen contra el **SUELO**

Built-In Dishwashers Quick Install Guide

*** This quick install guide is not designed to eliminate the need for the owner's manual. For complete installation instructions, please refer to the owner's manual packed with each dishwasher.**
*** The Warranty does not cover any product failure or damage that is caused by improper installation.**

If you are unable to mount the dishwasher flush with the countertop or the unit is not level with the countertop it could be the following:

1. Incorrect routing of the water line
2. Incorrect routing of drain hose
3. Incorrect routing of the power line
4. Uneven floor

Any of these could possibly cause a leak after final installation. The following 6 steps should be followed for correct installation of the dishwasher.

Step 1 The water supply and drain hose must be inserted through opening 'A' measuring roughly 8" (H) X 3" (W) due to the base assembly. Using a 1/2" hole saw, drill a hole in the TARGET AREA within 6" of the top and 4" of the back wall.

Step 2 The electrical cable must be located in the right side channel and the water supply line must be located in the left side channel as shown.

Step 2 - Prepare electrical wiring and water supply connection

Make sure the water supply line and electrical supply are routed through the channels under the dishwasher.

Step 1 - Drill hole in cabinet

WARNING
 Only use a hole locator within the target area. Fully use the hole saw. Do not use a compressed air or drain line.

Installing

Step 3 - Slide dishwasher into cabinet

1. Run the electrical and plumbing through the opening made in step 1.
2. Slide the dishwasher into the cabinet opening carefully. **Make sure that the drain hose inside the cabinet is not kinked.**

Step 4 - Connect the water and electrical supply to the dishwasher.

- * Make sure the electrical power supply is turned off.

Step 5 - CHECK DISHWASHER BALANCE

1. Adjust the legs of the dishwasher to the height of the underside of the countertop.

Step 6

1. Mount the dishwasher to the cabinet using the included brackets and screws.
2. Before securing the product, make sure it is level and plumb.
3. Operate the dishwasher (Normal cycle is recommended) to check for water leaks and operating conditions.
3. Replace the lower cover.

Step 3 - Remove disposal plug

1. When installing the drain hose to a disposal be sure that the plug on the disposal has been removed.

Step 3 - Install drain line

- The opening in the side of the cabinet must be large enough to fit the drain hose. Smooth out or pad the edges of the opening. Pull the drain hose through the opening slowly and carefully.

Step 4 - Hook up water and power

- Tighten the compression nut and make sure that the line is not kinked or pinched.
- Use proper wire nuts and strain relief per local standards.

Step 5 - Level the dishwasher

- Check that dishwasher is level.
- Attach level on top front opening of tub from side.
- Attach level on front side of tub.
- Make sure that the gap between the door and the tub is equal on both the left and right sides.
- If the water level is not equal, adjust the front tub leveling feet.
- If the water level is not equal, adjust the front tub leveling feet.

Step 6 - Avoid damage to control panel

- If the top mounted screws are not fully drilled in, there is a risk the panel may become scratched.

INSTALLATION TIPS

- (See Quick Install Guide or owner's manual for more details.)
- Make sure the dishwasher is level from side to side AND from front to back to avoid water leaks during operation.
- Make sure the hose is not kinked or damaged, to avoid drainage problems or leaks.
- If the door does not close properly, re-level the appliance so the gap between the door and the tub is even on both sides. The corners of the door should not catch when closing the door.
- Securely attach the dishwasher to the countertop or cabinet to avoid leaks or malfunction.

CONSEILS POUR L'INSTALLATION

- (Veuillez consulter le guide d'installation rapide ou le manuel de l'utilisateur pour obtenir plus de détails.)
- Assurez-vous de mettre le lave-vaisselle de niveau d'un côté à l'autre et d'avant en arrière afin d'éviter des fuites pendant l'installation.
- Vérifiez la présence de nœuds ou de bris sur le tuyau, qui pourraient causer des fuites ou des problèmes lors du drainage.
- Si la porte ne se ferme pas correctement, veuillez mettre le lave-vaisselle à niveau de nouveau pour que l'espace compris entre le panneau frontal et la cuve soit le même d'un côté à l'autre. Les coins du panneau frontal ne doivent pas accrocher le cadre de la cuve au moment de fermer la porte.
- Le lave-vaisselle doit être solidement fixé au comptoir ou aux armoires pour éviter des fuites ou un dysfonctionnement.

TIPS DE INSTALACIÓN

- (Vea la Guía de Instalación Rápida o el manual del usuario para más detalles.)
- Asegúrese de que el lavaplatos esté nivelado de lado a lado y del frente hacia atrás para evitar fugas de agua durante la operación.
- Asegúrese de que la manguera no esté torcida o dañada, para evitar problemas de drenaje o fugas.
- Si la puerta no cierra apropiadamente, re-nivele el electrodoméstico para que el espacio entre la puerta y el tubo sea parejo en ambos lados. Las esquinas de la puerta no deben captarse al cerrarla.
- Adhiera de forma segura el lavaplatos al mostrador o gabinete para evitar problemas en su funcionamiento o fugas.

Make sure the water level in the tub.
Vérifiez la présence d'eau au fond de la cuve.
Asegúre el nivel de agua en el tubo.

Check for interference at the door corner.
Vérifiez l'alignement adéquat des coins de la porte.
Revise la interferencia en la esquina de la puerta.

No presione
N'appuyez pas
sur le couvercle

NOTE / NOTA / REMARQUE
 Remove the protective film from the door, if present. Leaving the film on may cause discoloration or condensation on the door.
 Retire la película protectora de la puerta, si la hubiera. Dejar la película puede ocasionar descoloración o condensación en la puerta.
 Retirez la pellicule protectrice qui se trouve sur la porte, s'il y a lieu. Si vous la laissez en place, elle pourrait décolorer la porte ou causer de la condensation.
