The beauty of daylight

Daylight has a quality that we respond to emotionally.

Colors read true, finishes reveal their texture, and an uplifting quality pervades any room bathed in daylight.

As we become more conscious of our footprint on this planet, we realize that making the most of daylight in our homes simply makes sense. Utilizing daylight reduces our need for electric light and saves energy.

Lutron® shading systems provide precision control of daylight – all at the touch of a button. Sivoia® QS Wireless is an innovative wireless shading system from Lutron that is beautiful, expandable, and reliable.

Lutron® shades

Lutron shades blend sophisticated style with elegant transitions of daylight.

Shade fabric

Choose from an extensive selection of shade fabrics to find the perfect complement to your room's décor and superior performance in daylight control.

Shade performance

Precision alignment of Lutron shades mirrors the clean lines and attention to detail that are the essence of good design. Ultra-quiet operation ensures serenity.

Lutron shading systems control daylight beautifully — all at the touch of a button.

The Pico® control

A small, powerful, customizable innovation from Lutron®

The Pico control has a slim, sleek design and intuitive functionality that makes it attractive on every level.

Simple is beautiful.

No wires — take control anywhere.

The Pico can function as a stylish tabletop control on a pedestal, a lightweight handheld remote, or it can be wall-mounted within a Lutron Claro® faceplate to mimic a traditional keypad, but without wires.

Create a customized, simple solution that is ideal for your application.

Single room

Whole home

Sivoia® QS Wireless is an expandable shading system.

At the simplest level, control shades in a single room. Conveniently raise and lower shades for the right light in a space and to reveal the view.

For the ultimate in convenience, and to fully realize the power of a precision controlled shading system, control all the shades in your home from a centralized location.

seeTouch® scene control keypad (not actual size)

Single room

Transform a space simply with Sivoia® QS Wireless shading systems. The Pico® wireless control gives you the power to adapt a space to your needs at the touch of a button.

Dual Pico controls two groups of shades

Lutron® shades | benefits throughout your home

Conveniently adjust shades from a bedside control - lower blackout shades to ensure privacy and a good night's rest

Reduce solar heat gain and lower cooling costs
Preserve the view with sheer shades

Manage daylight to enhance your multimedia experience

Eliminate glare to increase comfort and productivity

Benefits of shading throughout your home

Take shading to the next level and experience the many advantages of whole-home control.

Centralized control

Beyond convenience, centralized control allows for shade control strategies customized to your lifestyle.

Shading “scenes” give you the ability to simultaneously move shades in different rooms throughout the home to accommodate your needs. Choose scene settings such as “Morning” or “Away” to simplify your daily routine.

Utilize your shading system to save additional energy beyond routine use of shades. “Winter warm” opens the shades to take advantage of sunlight warming a southern façade. “Summer cool” does the opposite by lowering the shades and blocking solar heat gain to help reduce cooling costs.

expandable

• Morning

Morning scene:

Welcome the day and create pleasant light for your morning routine.

• Away

Away scene:

Create an orderly façade at the front of your home. Close all other shades for security.

• Summer cool

Summer cool scene:
Block the sun on a southern façade and save on cooling costs.

• Winter warm

Winter warm scene:
Harness daylight to warm your home. Close other shades to create an insulating thermal blanket and save on heating costs.

Premiere residences worldwide, including the White House, feature Lutron® controls.

Reliable

If it has to work, it has to be Lutron®.

Architects and designers worldwide turn to Lutron for their most prestigious projects.

The Lutron name has become synonymous with quality and performance. Lutron holds over 250 patents and manufactures more than 15,000 products. For almost 50 years, Lutron has exceeded the highest standard of quality and service. Every one of our products is quality-tested before it leaves the factory to ensure the highest level of reliability.

Lutron ClearConnect wireless communication

Lutron utilizes its own Radio Frequency (RF) technology, designed to be the most reliable in the industry. It accomplishes this in a number of ways:

- Low power frequencies – less interference from other devices and penetrates construction material more easily for improved function
- Dedicated, fixed network ensures messages are reliably delivered
- Unique house codes, device addresses, and serial numbers means co-located systems will not cross-talk
- Performs “Group Commands” to ensure smooth, simultaneous system responses from all devices
- More than a decade of RF production, sales, and installation; more than one million products installed
- Seven RF-specific patents

Sivoia® QS Wireless product line

Sivoia QS Wireless control components

The versatility of Sivoia QS Wireless lets you customize control to best suit your lifestyle.

Choose a Pico® control for single room control — supplement with scene control tabletop or wall keypads. Hidden devices such as the main repeater expand the system for multi-room control and touch-screen control of your wireless shades.
