PREPARATION

1. Shut off the power at the fuse box or circuit breaker box. If necessary, remove the old fixture and all mounting hardware from junction box.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any parts necessary for installation.

ASSEMBLING THE FIXTURE(Fig.1)

3. Choose the suitable number of stems and install the stem (G, H, I, J) onto the nipple (K), then thread the stem (G, H, I, J) onto the coupling (F).

MOUNTING THE FIXTURE (Fig.1)

4. Thread the two mounting screws (A) (Size: #8-32*1.1"L) part way into the crossbar (B). Secure crossbar (B) to the junction box (not provided) with junction box screws (C) (Size: #8-32*0.6"L). The length of mounting screws (A) into crossbar (B) may be adjusted if necessary.

CONNECTING THE WIRES (Fig.2)

5. At this point, connect the electrical wires as shown in figure 2, making sure that all wire connectors are secured. If your junction box has a ground wire (green or bare copper), connect the ground wires from the hanger ball and mounting plate to it. Otherwise, connect the ground wire from the hanger ball directly to the mounting plate ground wire and secure with the green screw provided. After wires are connected, tuck them carefully into the ceiling junction box.

COMPLETING THE INSTALLATION (Fig. 1)

6. Align canopy (D) to mounting screws (A) and secure with cap nuts (E).
7. Place the glass shade (M) over the socket (L) and secure with the socket ring (N) with the wrench (O) provided.
8. Install the proper light bulb for your fixture. Install the light bulb (not included) in accordance with the fixture's specifications. **(DO NOT EXCEED THE SPECIFIED WATTAGE!) (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!)**

Your installation is now complete. Return power to the outlet box and test the fixture.
