

INSTALLATION INSTRUCTIONS

FOR 2933-L

For LED Wall Mount Fixture

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DO DISJONCTEUR.

PREPARATION

1. Shut off power at the fuse box or circuit breaker box. If necessary remove the existing fixture and its mounting hardware from the wall.
2. Carefully remove the new fixture from the carton and check that all parts are included as shown in the illustration.
3. Position mounting plate (A) on the wall, and mark the location of the two drywall anchors (G). Pre-drill the holes for the drywall anchors (G). Then insert the drywall anchors (G) into the wall.

HANGING THE FIXTURE (Fig.1)

4. Attach the mounting plate (A) to the outlet box using outlet box screws (B) (Size: 8-32*1/2"L). The side of the mounting plate marked "GND" must face out.
5. Place the wood screws (F) through the holes of the mounting plate (A) and into the drywall anchors (G) to secure the mounting plate (A) to the wall.

CONNECTION THE WIRES (Fig. 2)

6. At this point, connect the electrical wires as shown in Fig.2, making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the mounting plate using the green screw provided. After the wires are connected, tuck them carefully into the outlet box.

FINISHING THE INSTALLATION (Fig. 1)

7. Align Fixture (E) over mounting plate (A) and secure with screws (D).

Your installation is now complete. Return power to the outlet box and test the fixture.

CAUTION /ATTENTION: When handling the fixture, do not apply pressure to the LEDs. Hold the fixture by the base or fixture body (E) only.

Fig.3

Replacing LED module (Fig.3)

The LED module can be replaced by a qualified electrician without cutting the wires and without damaging the decorative element to which the fixture is attached. See installation steps for more details (Fig 3.)

Warning: Turn off power at the fuse box or circuit breaker before replacing LED module.

- a. To remove the fixture from the wall: loosen screws (D), and remove the wire connectors. Then place the fixture on a clear flat surface.
- b. Loosen screws (P), hex nuts (F) screws (M), wire fastener (N) and then carefully remove LED module (I).
- c. Reverse steps a-b for installing the new LED module.

Note: The LED module should be provided by a specified supplier.

IMPORTANT: Fixture should be installed by a qualified electrician to ensure proper wiring and installation.

Dimmable with C-L (CFL & LED) type and Incandescent/Halogen type dimmers
