1 Rail Mounting Instructions,Locating the Mounting Position

60 "

16"   16"   16"

DH + 1.7inch

Determined
in the field

(4.8"for reference)

DH

3/8"

DH = Door Height

Recommend that you layout
your door and hardware on the
floor first to determine spacing.

Measure twice Mount once

Rail must be level to keep door
from moving by itself!

DH + 1.7inch

2"
Ø 7/32"

Note: Stops may end up inside end mounts depending on your hanger placement,If so place stops on rail before mounting rail.
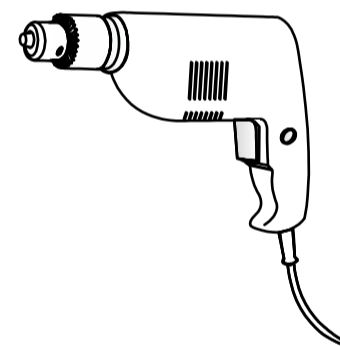

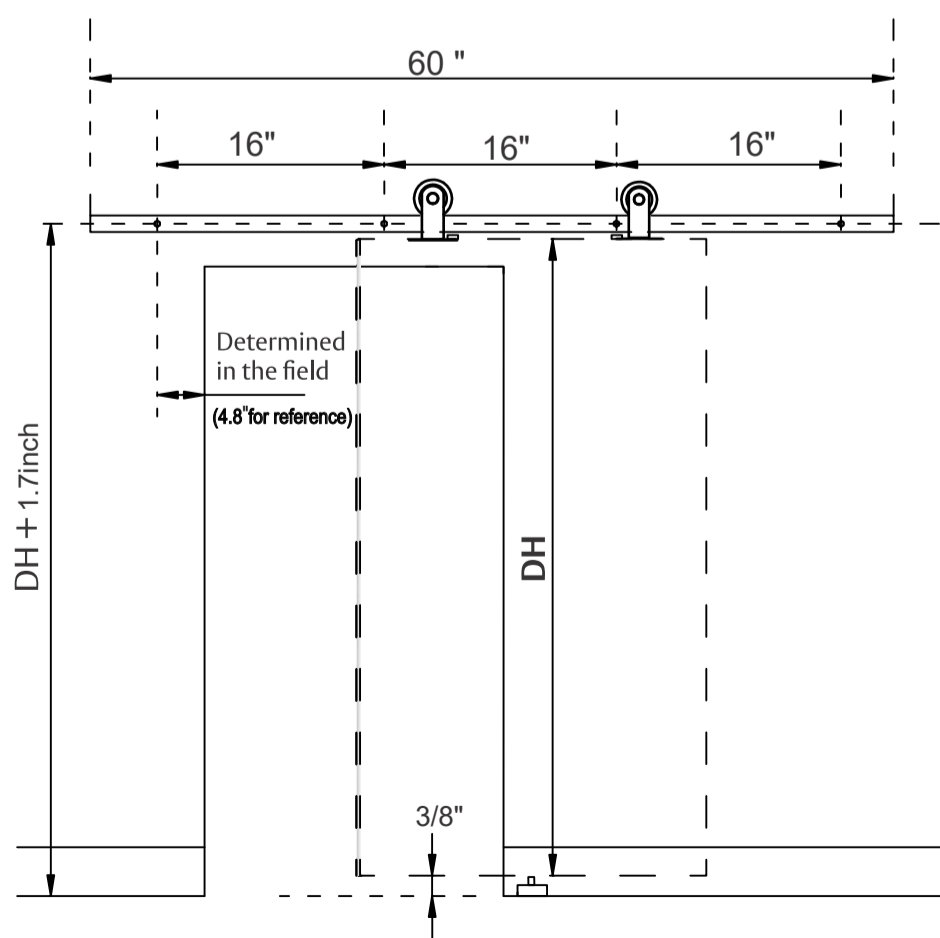

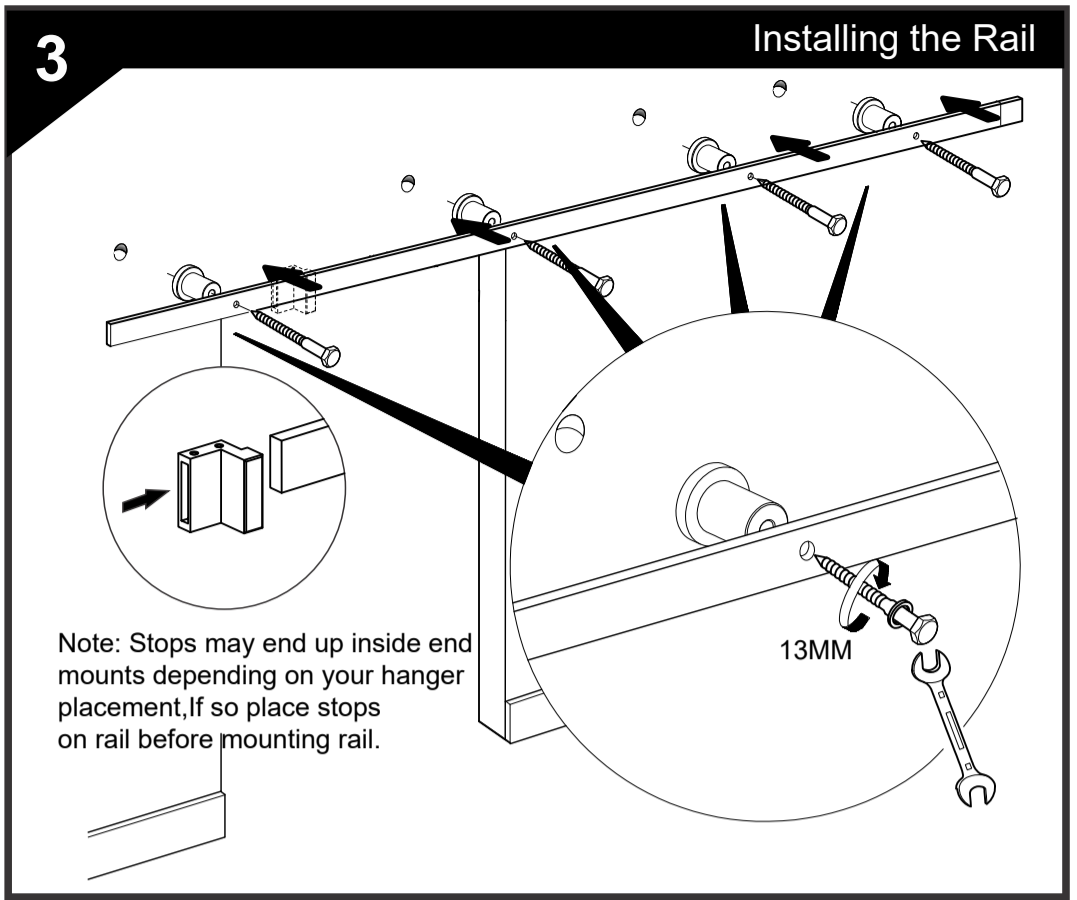

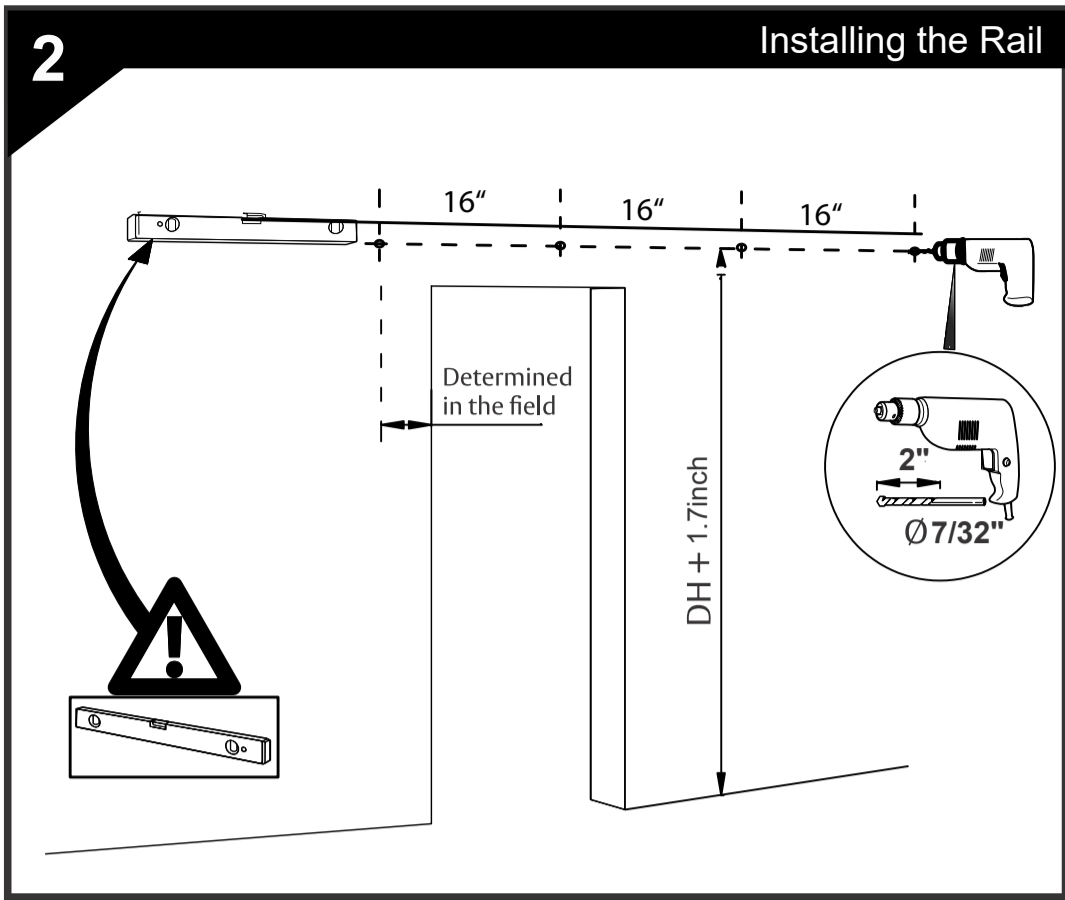

13MM

⚠ All Rail Mounts must be screwed into a solid Wood Header

(X2)

1.2"
Ø 5/32"

3.5" 3.7"
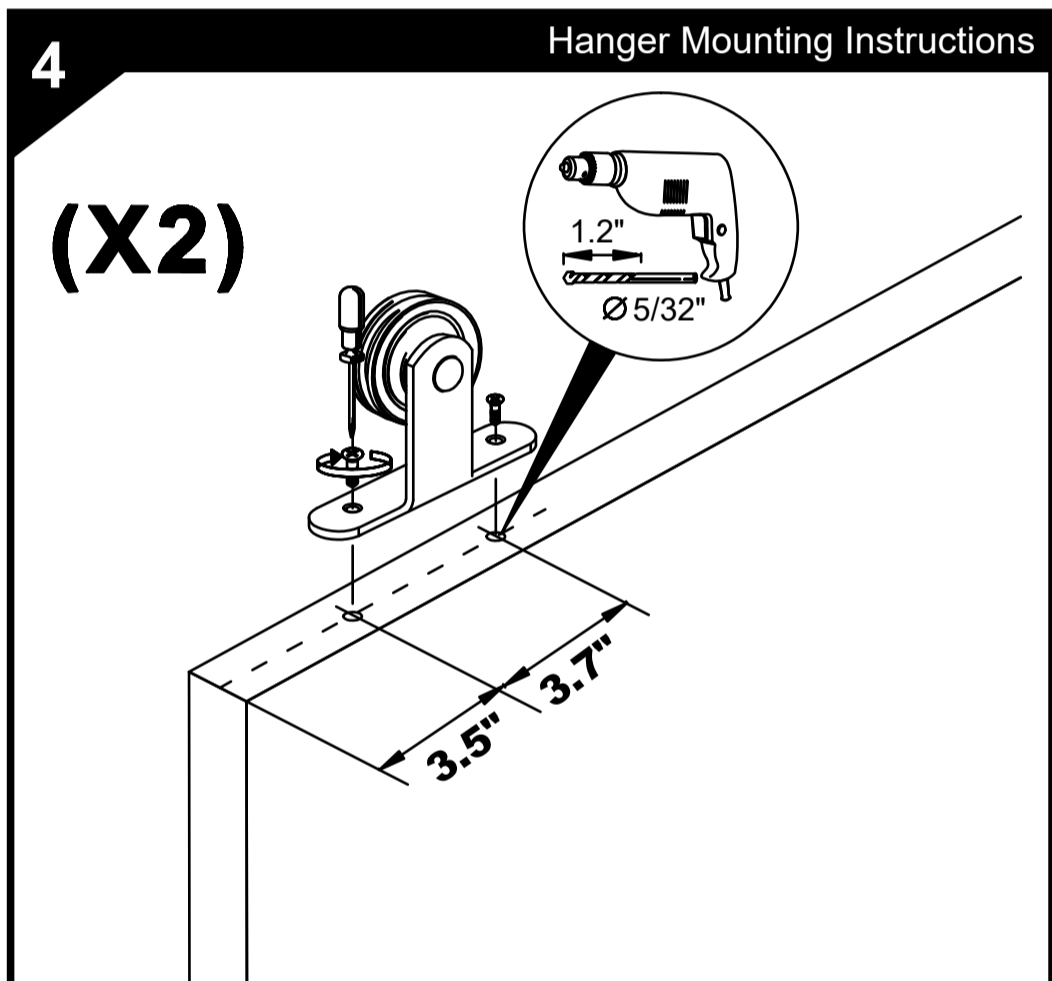

Hanger position from the edge can vary based on your door design.
Position Shown is for a flat Surface Door you may have to Adjust to center Hanger onto the vertical styles of your door

STILES

(X2)
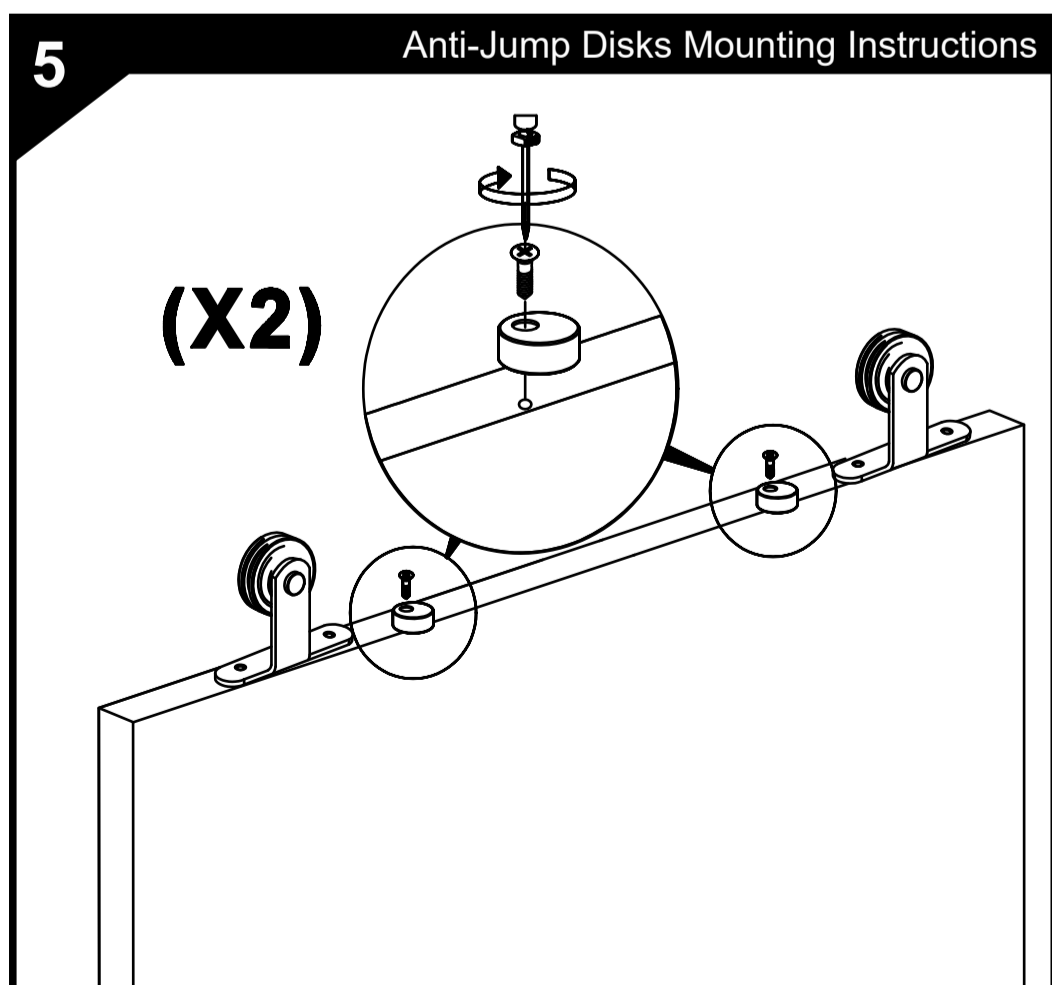

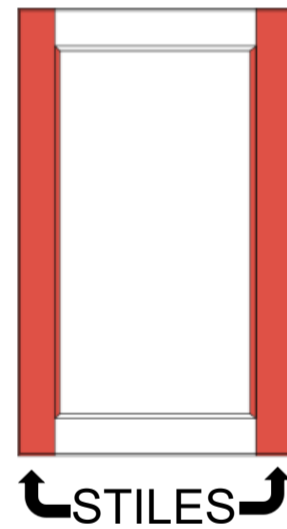

Anti Jump Disks keep your door from accidently coming off the Rail.
They are installed offset with the Screw outside the rail in case you need to remove the door later.
Once your installation is complete rotate the Disks under the rail and tighten down.

The Guide Stabilizes the door by keeping the bottom from Swinging. Kit includes both a Mortise (Grove in the bottom of the door) and a Non-Mortise option.
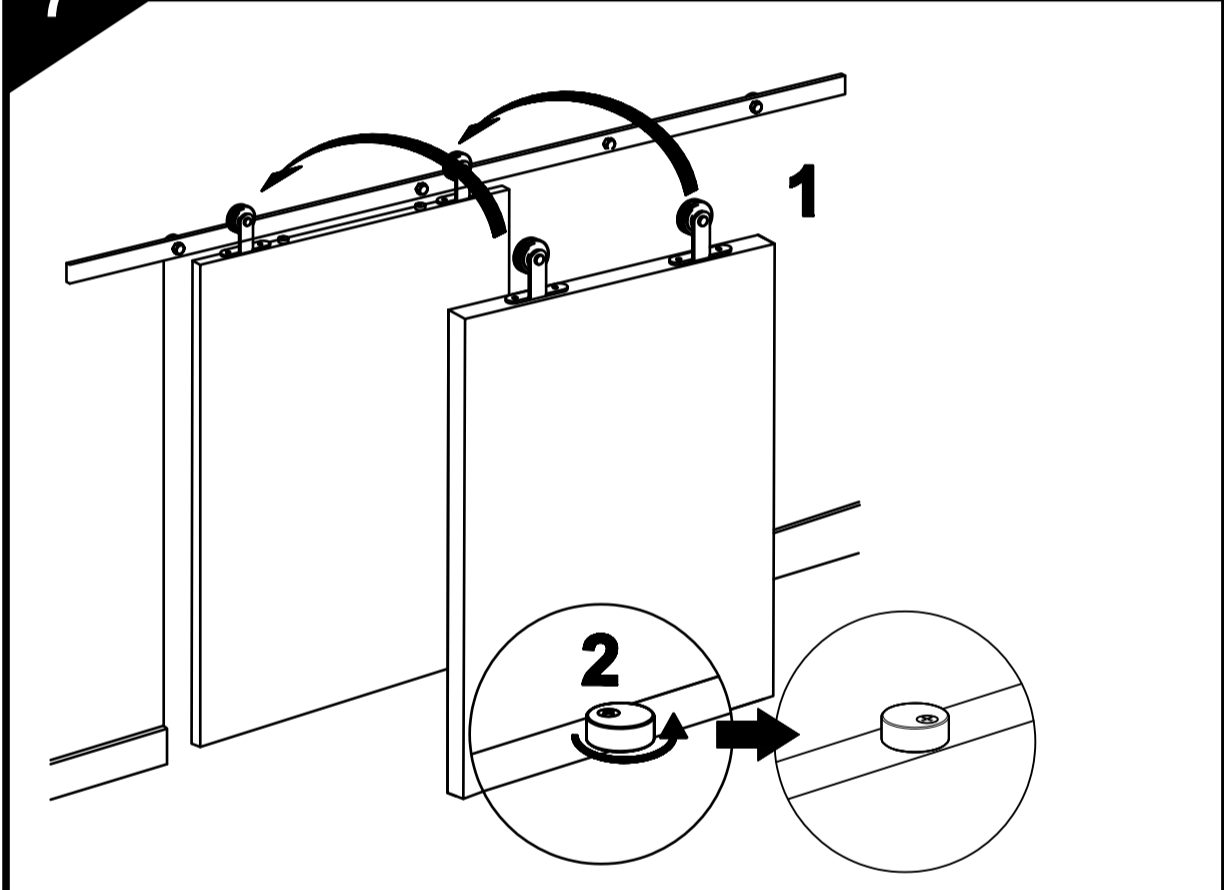

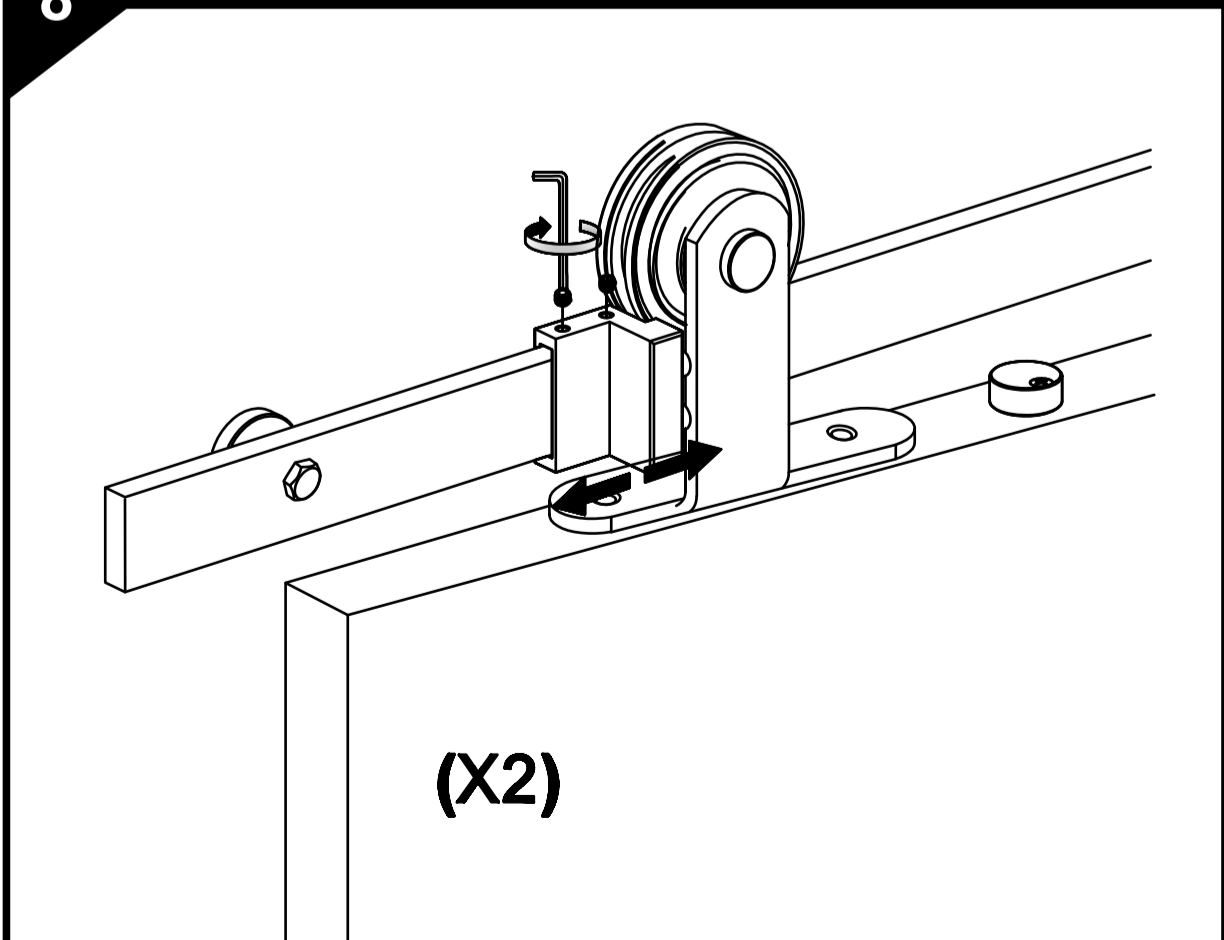

This step will require hanging and removing the door to measure and install the Guides
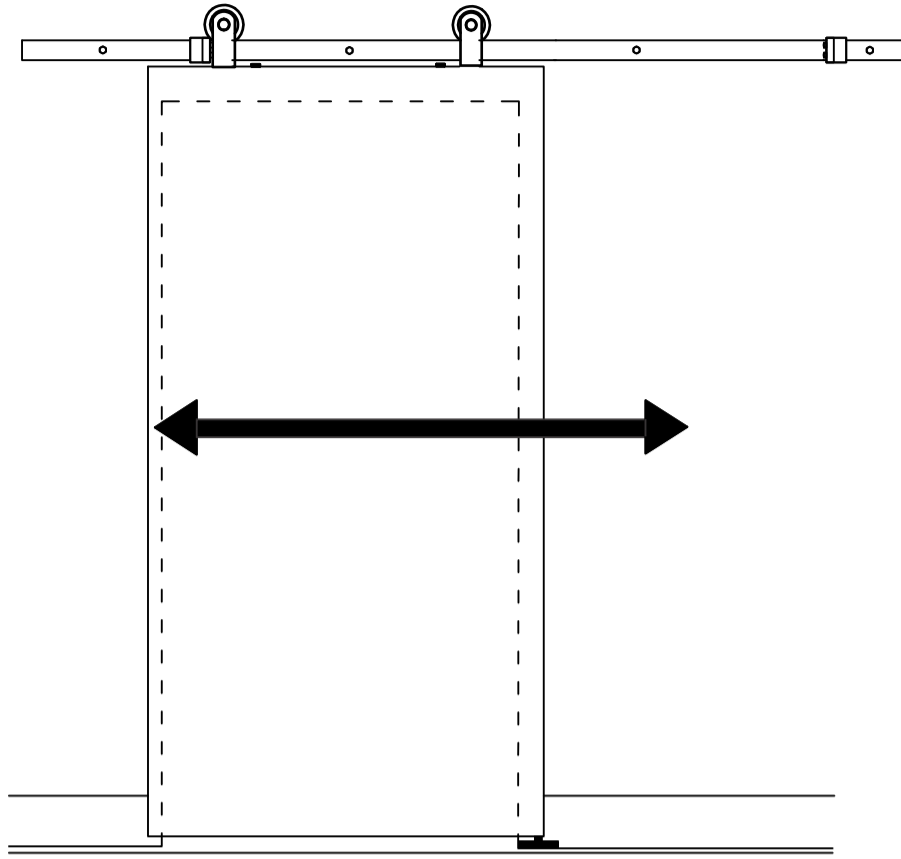

7 — Final Door Hanging - Anti-Jump Disk Lockdown

1

2

Hang the door and slide it into the Floor Guide then Rotate the Anti Jump Disks under the rail and tighten down the screws to lock them in place

8 — Door Stop Positioning Instructions

(X2)

Adjust your Door Stops to your desired position and lock down your Door Stops with the Allen Wrench Provided

Door should Slide smoothly in both Directions

Optional Accessories
