11	Rubber gasket	25	Rubber ring
12	Metal gasket	26	Aerator
13	Lock nut	27	Spout shell
14	Screw	28	Hot & cold hose

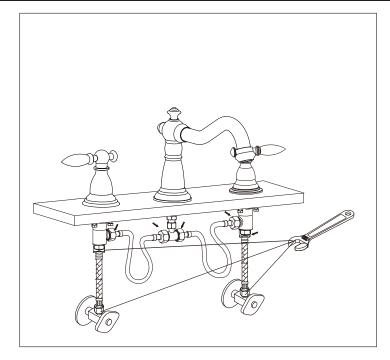

Widespread Bathroom Basin Sink Faucet product is CUPC, AB1953, WATERSENSE and NSF certified.

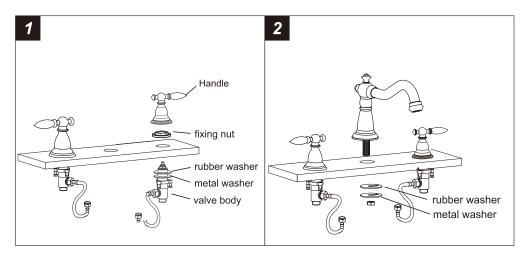

ASME A112.18.1/CSA B125.1

The tools might be applied to the following places:

Step 1 Faucet installation

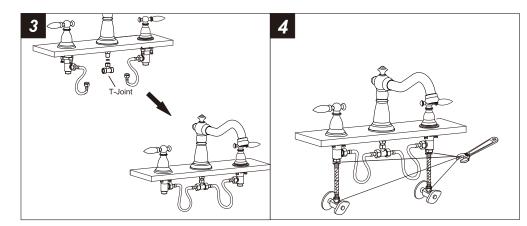

1. Handle installation

- 1-1. Disassemble the cold water handle.
- 1-2. From underneath, insert the cold water valve, rubber washer, metal washer and lock nut. From Top, install the handle and fixing nut.
- 1-3. Screw the nut to secure the valve.
- 1-4. Repeat steps to install hot water handle and hot water valve.

2. Spout installation

- 2-1. Disassemble the spout.
- 2-2. Place rubber washer, metal washer and nut in order and secure the nut.

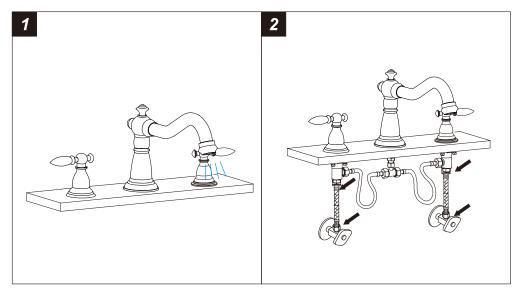

- 3. Connect and tighten the T-Joint to the shank. Connect hoses from valve body to the T-Joint.
- 4. Connect the flexible hoses to water supply valve (not included) and copper tubes, and tighten it with adjustable wrench. **DON'T OVER TIGHTEN!**

Caution: make sure connect the hot and cold flexible hose to supply valves correctly.

Warning: The supply valves are not included, please purchase them in plumbshop.

Step 2 Checking and testing

- 1. Turn the faucet handle all the way on, turn on hot and cold water supply and flush water lines for one minute.
- 2. Check all connections at arrows for leaks, re-tighten it if necessary.

BUT DON'T OVERTIGHTEN

Step 3 Cleaning and care

Daily cleaning and care are required in order to keep the product shining and properly working.

- 1 Clean it with water and dry it with soft cloth.
- 2 Clean the product with gentle liquid or glass cleaner.
- 3 Don't use acid cleaner.
- 4 Don't clean with abrasive material, abrasive paper or knife.
