

CARE & MAINTENANCE STONE COUNTERTOP

NOBV-30CM-280BN-317G with
BM-116 and PUD-BN-MR

Glacier Ice Kits

Glacier Ice
(if included) will
not only protect the
stone product but
also the faucets, as
well as porcelain and
glass sinks from hard
water and mineral
buildup. This presoaked cloth will
cover up to 40 sq. ft.

Glacier Ice Faucet and Sink
professional sealer kit will not only
restore the stone counter
top but also the faucet, sink
and shower door from
mineral buildup and hard
water spots. It will also
protect from future mold,
corrosion, oxidation and
mildew. Treats up to
100 sq. feet.

These vanities, stone countertops, vessel sinks, faucets and drains are incredibly easy to clean and maintain. To keep them in pristine condition simply wipe down with a soapy sponge or soft cloth, rinse and dry. A cleaner such as [Glacier Faucet and Sink Restore Cleaner with Sealer Kit](#) or any other non-abrasive cleaner may be used if grime or minerals build on any of our products except for the wooden vanities.

For basic cleaning of the vanity's wood, simply use a soft clean cloth, mild soap and water, other cleaners are not necessary. You can maintain the vanity once or twice a year by cleaning it as you would with any wood furniture polish/cleaner.

As with other natural materials, the vanity's wood can be affected by environmental factors such as natural and/or artificial lighting. Darkening or mellowing of the wood can be expected which is a natural process as the wood ages.

Caution: Do NOT use metal brushes, or scouring pads when cleaning the vanity, countertop, or backsplash as this may scratch them. Damage due to use of cleaners containing abrasives, alcohol or other organic solvents, whether performed by a contractor, service company, or yourself, are excluded from the warranty. Using basic soap and water is recommended as other cleaners may discolor, damage or stain the wood or natural stone.
