Buy it for looks. Buy it for life.®

Level™ single-handle pull-down faucet / 7175

Versatility. Convenience. Choice.

Moen designs pullout faucets with the best combination of useful features to make your experience in the kitchen easier and more rewarding. And by offering this extended versatility without the need for a separate side spray, pullout faucets provide a clean, uncluttered look on the countertop.

Useful Features Designed for Everyday Life

90°™ single-handle pullout faucet / 7597

Secured Docking

An innovative design keeps the spray wand docked tightly in the spout for a secure connection that will not loosen with repeated use.

Effortless Operation

The wand is as easy to pull out as it is to use. A gentle pull instantly releases the wand so you can smoothly and quietly extend the far-reaching fiber hose. A balanced weight helps you return the hose just as easily.

Multi-Function Spray Options

Multi-function spray heads have up to three functions, including aerated stream, powerful rinse and pause feature. For convenience, Moen faucets revert back to the standard stream setting when you turn off the flow at the handle.

Camerist® single-handle pullout faucet / 7545ORB

Patented Pause Feature

Several pullout faucets offer a pause button to temporarily control the flow of water, making it possible to fill vases or pots outside of the sink without making a mess.

Smooth, Comfortable Movement

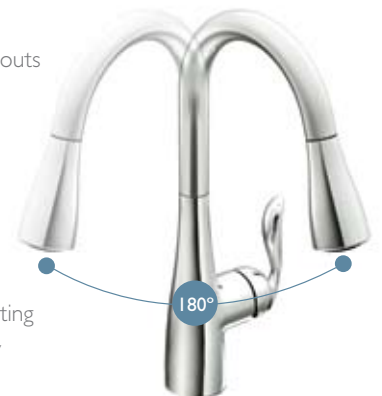

To reduce resistance during use around the sink, all pullout faucets feature a swivel ball joint at the wand and hose junction. This design pivots easily to provide increased comfort and range of motion.

Wide Spout Range

All Moen pullout faucets have spouts that swing 180° left to right – making it easier to work in the sink and giving you the ability to cover more of the sink when the wand is docked.

Pulldown Bar/Prep Faucets

Several styles also offer coordinating bar/prep faucets, providing a fully coordinated look and pulldown convenience at a second sink location.
