

MBOFS6636A

66" x 36" x 21.75"

GENERAL SPECIFICATIONS:

Installation: Freestanding

Material: Acrylic

Soaker Weight: 125 lbs / 57 kg

Maximum Fill: 60 gal to overflow

NOTE: Filling this tub to the maximum may require an above average size or dedicated water heater.

IMPORTANT ORDERING & INSTALLATION INFORMATION:

- Freestanding tub is designed to install on a finished floor that is flat and level.
- Tub has room between tub walls on the drain side and underneath for plumbing connections roughed-in above the finished floor.
- Tub has no access panel, however a panel may be specified at the time of order. Factory installed access panel will be visibly located behind the waste and overflow. Please consider access panel visibility before ordering and when planning final installation position.
- The Virtual Spout is installed below the water level of the tub. MTI supplies a Wilkins dual check valve and an Acme in-wall atmospheric vent to backsiphonage. However, some areas of the country require additional backflow prevention when water is introduced to the bath below the water level. Please check local codes.
- Options listed cannot be combined with Designer Collection options.

• Before discarding tub crate, check for accessories that may be packaged inside.
 • All product measurements are $\pm 1/2"$.
 • Specifications and configurations are subject to change without notice.
 • Measurements herein supersede all others published prior to publication date below.
