WhisperLite™ Ventilation Fan/Light Combination

- Super Quiet Operation
- ENERGY STAR® Efficient Fan and Lighting Fixture
- New Convenient Night-Light Feature
- New Enhanced Grille Design
- Totally Enclosed Condenser Motor For Long Life
- Rated For Continuous Run
- Easy Installation (Double Hanger Bar System)
- Rust-Proof Paint Treatment On Galvanized Housing
- Built-In Damper To Prevent Back Draft
- UL Listed For Tub/Shower Enclosure When Used With A GFCI Branch Circuit Wire
- Thermal Fuse Protection
- Meets Washington State Ventilation And Indoor Air Quality Code

Panasonic ideas for life

FV-07VQL3/FV-08VQL3/FV-11VQL3 WhisperLite™ Ventilation Fan/Light Combination

Panasonic WhisperLite Ventilation Fan/Light Combinations provide two important functions in one compact, energy-efficient unit. Equipped with a pair of 13W Panasonic Compact Fluorescent Lamps, each WhisperLite fan supplies substantial illumination. The easy-to-use Night-Light feature offers additional convenience and versatility. And like all Panasonic ventilation fans, WhisperLite units boast ultra-quiet performance and outstanding energy efficiency.

Enhanced Grille Design

All WhisperLite ventilation fans feature a sleek, unobtrusive grille designed with today's styles in mind. In addition to offering a pleasing appearance for a variety of applications, this enhanced grille also contributes to the extremely quiet operation of the fans.

Super-Quiet Operation

From the wide-format blower wheel to the energy efficient four-pole motor design, WhisperLite fans are specially designed to perform as quietly as possible. This results in sound levels as low as 0.3 – 1.2 sones, figures which are among the lowest in the industry.

Easy Installation

WhisperLite fans are specially engineered for flexible, trouble-free installation. And they come with a special double hanger bar, allowing for placement in the ideal location.

Energy Efficient

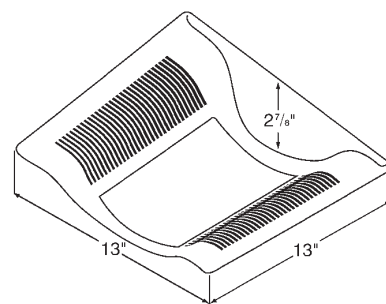

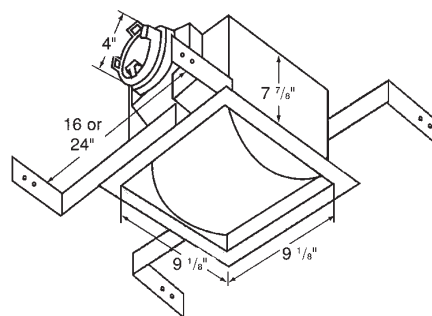

All WhisperLite fans are ENERGY STAR qualified, and depending on fan size, duct size and static pressure, feature up to 110 cubic feet of air movement per minute. Boasting ultra-efficient CFM to Watt ratios, these fans may even qualify for an energy saving rebate, which are often provided by local utility companies and based on ENERGY STAR guidelines. Check with your local utility company for details.

Incomparable Quality

Durable, totally enclosed condenser motor. Permanently lubricated motor bearings. Rust proof paint. Galvanized steel body. Our outstanding ventilation performance and consistent customer satisfaction are evidence of our strict attention to detail and demand for quality.
