

PRIMO

Your gas lantern comes with a valve included. **(Fig #1).**

However it is equipped with a 90 degree fitting for wall mounting. Remove the flare nut and save it to use with the flare fitting included with the post mount kit and discard the 90 degree fitting. **(Fig #2).**

Using the flare fitting provided in the kit, install the gas valve in the lantern as shown in **(Fig #3).**

PRIMO

With a screwdriver, press through the wire mesh over the mounting holes at the bottom of the lantern (**Fig #4**).

Insert the mounting plate inside the lantern and using the nuts and bolts provided, attach the post mount to the bottom of the lantern (**Fig #5** and **Fig #6**)
