TOPMOUNT SINKS

Installation/
Mounting Guide

THE INSTALLATION OF ANY TOPMOUNT-STYLE SINK

Our topmount sinks are designed to be mounted over the countertop. In addition to silicone caulking, various styles of clips are used to further secure sinks to the counter.

TOPMOUNT SINKS

Installation

THE STEPS

- Using the template provided, measure and cut the hole in the countertop.
- Determine the locations for the clip brackets around the perimeter of the sink. Pre-drill holes for the clips using appropriate methods for the countertop material.
- Clean the surfaces of the sink and countertop which will meet, with denatured alcohol.
- Evenly apply a bead of silicone along perimeter edge of the opening on the top of the countertop.
- Carefully align the sink over the countertop opening.
- Evenly apply pressure to the sink securing a seal of the silicone against the countertop.
- Re-check that the sink is evenly aligned with the countertop.
- Attach and tighten the clip brackets against the edge of the sink. Do not tighten one screw completely before others. Partially tighten one clip then the one across from it, and so on until all clips are fully tightened. This will safeguard against an uneven or insecure installation.
- Use a cloth with denatured alcohol along the perimeter of the sink and countertop to remove any excess sealant.
