Drawer Preparation and Adjustment

Drawer Requirements

Dimensions

The diagram illustrates the dimensions and clearances for a drawer installation. Key dimensions include:

- Opening width:** The total width of the cabinet opening.
- Outside drawer width:** The width of the drawer's exterior.
- Inside drawer width:** The width of the drawer's interior.
- 7 (9/32") Minimum top clearance:** The required gap between the top of the drawer and the cabinet's top rail.
- Maximum height with bin = Opening height minus 28 (1-3/32"):** The maximum height for a bin inside the drawer, calculated by subtracting 28 (1-3/32") from the total opening height.
- 21 (13/16"):** The required side clearance between the drawer side and the cabinet side.
- 13 (1/2"):** The height of the drawer's base.
- 21 (13/16") Maximum bottom clearance depending on cabinet bottom recess:** The required gap between the bottom of the drawer and the cabinet's bottom rail.

NOTE: Drawer side material thickness may vary. Accurate measurement of drawer side material thickness should be used when calculating outside drawer width using the table below. Inside drawer width **must** equal opening width minus **42** for MOVENTO to align and function optimally.

Waste/recycle set	Minimum opening width	Inside drawer width	For drawer side thickness		
			16 (5/8")	15 (19/32")	13 (1/2")
769R5337SB	305 (12")	263 (10-11/32")	295 (11-5/8")	293 (11-17/32")	287 (11-11/16")
769R5337SD	381 (15")	339 (13-11/32")	371 (14-19/32")	369 (14-17/32")	363 (14-11/16")
769R5337SF	457 (18")	415 (16-11/32")	447 (17-19/32")	445 (17-17/32")	439 (17-11/16")
NOTE: Drawer length is 533 (21") for all sets.			Outside drawer width
