

# MC-195T-US Timer Controller

**Rinnai**<sup>®</sup>

# Key Features and Benefits

- Timer controller for recirculation for Rinnai Ultra and Luxury Series Tankless Water Heaters
- Dual Timer Programs
  - Allows for more convenience and better energy savings
- Override Function
  - Allows user to interrupt timer cycle, shutting off or starting recirculation per their immediate needs
- Combustion and Recirculation Indicators
  - Small, illuminated icons tell consumer if water heater is operating and recirculating
- Attractive, modern design

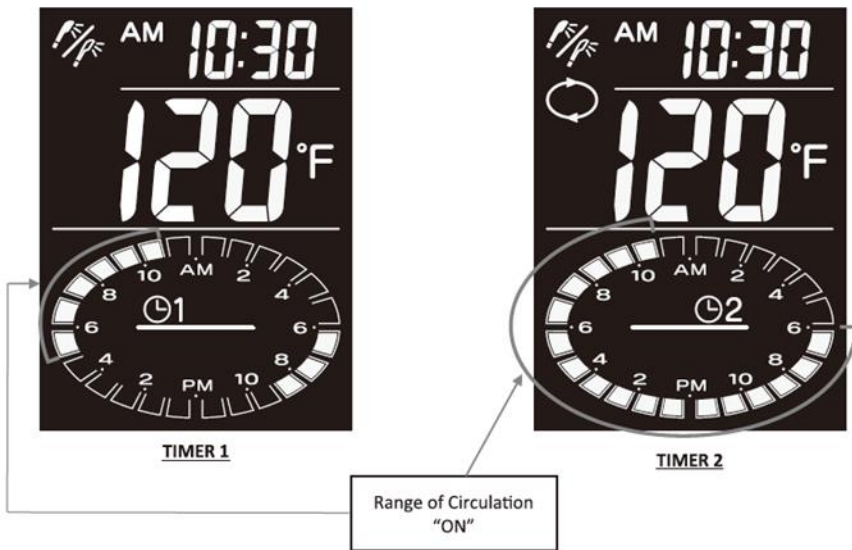

# MC-195T: Feature Overview

Note: This page is in the manual.

# MC-195T: Key Recirc Features

## Dual Timer Programs

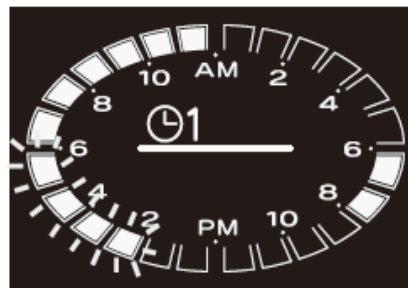

\*Allows homeowner to operate recirculation mode during different times, for example one program for weekdays, one for weekends.

## Override Feature

Press "OVERRIDE/SELECT"

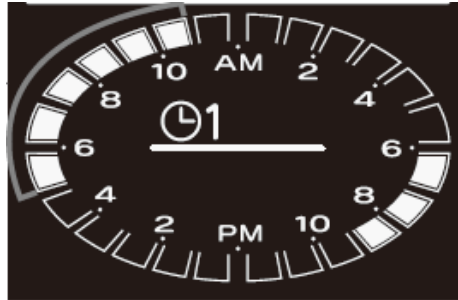

\*Allows homeowner to interrupt timer mode, starting recirc during "off" periods or stopping it during "on" periods.

# MC-195T Recirculation

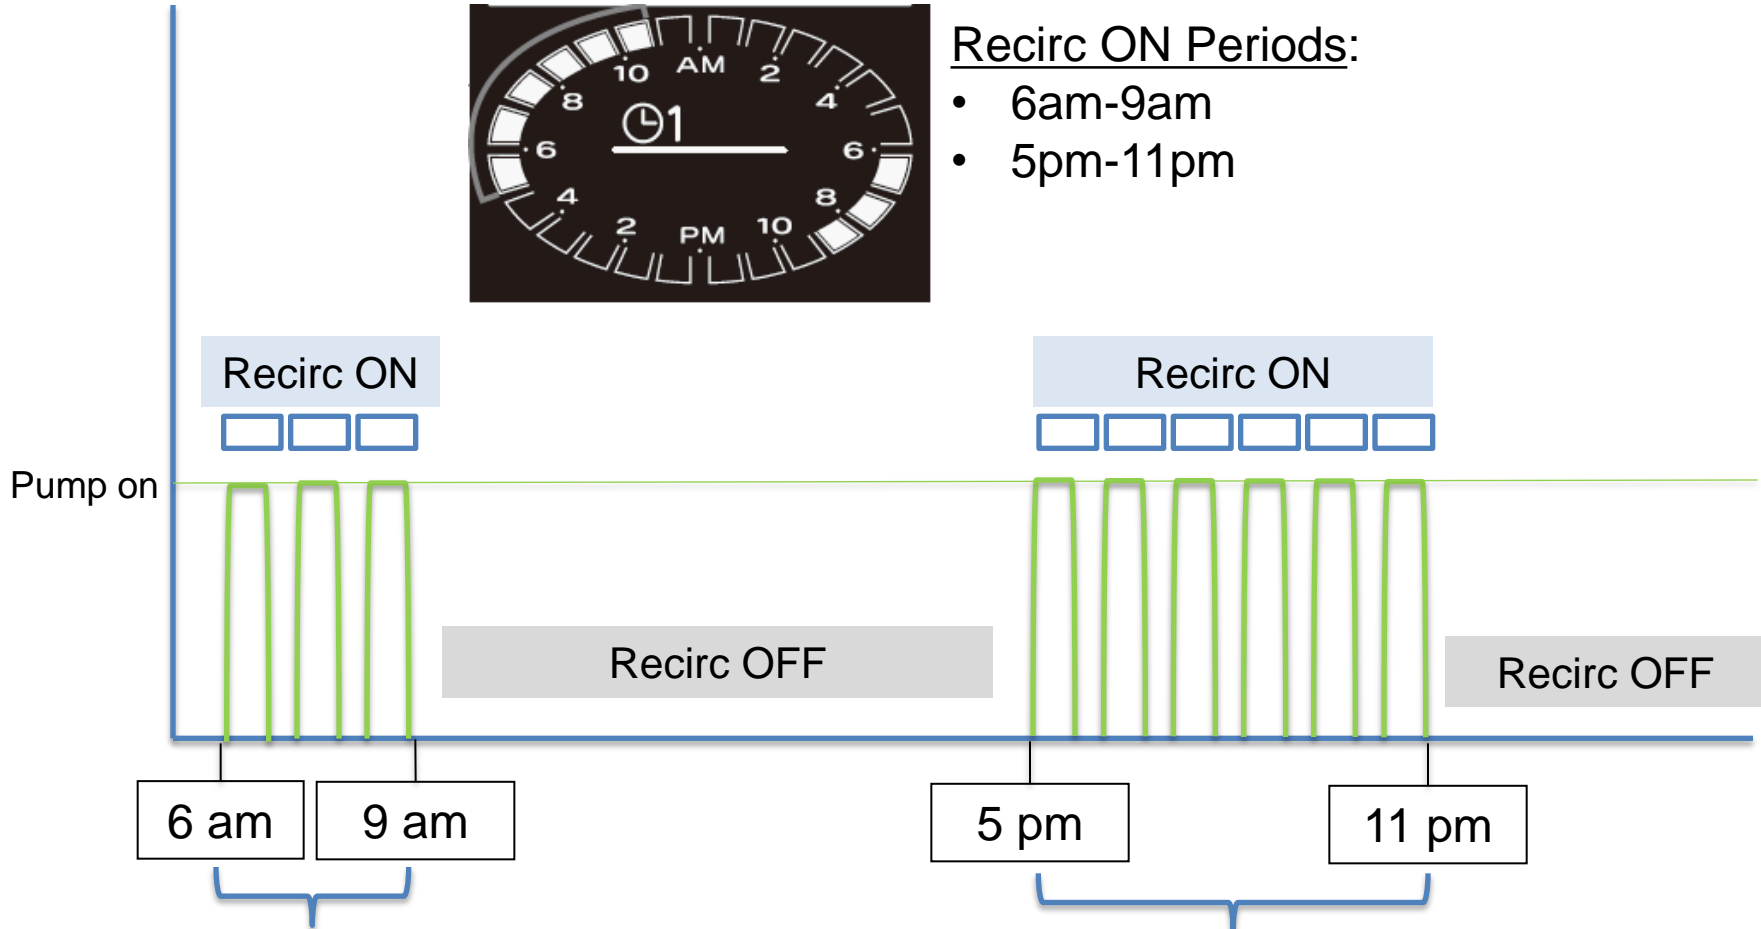

- The MC-195T works with the Circ-Logic™ programming found in all Ultra and Luxury Series units (KB and VC only)
- Circ-Logic™ controls on/off sequence of pump during recirculation (or “Recirc On”) mode
  - NOTE: pump must be connected to the water heater per usual Circ-Logic™ instructions
- The MC-195T timer programs control when the Recirc function is ON or OFF
  - NOTE: the MC-195T should not be paired with a pump that has a timer.

# MC-195T and Circ-Logic

## Recirc ON Periods:

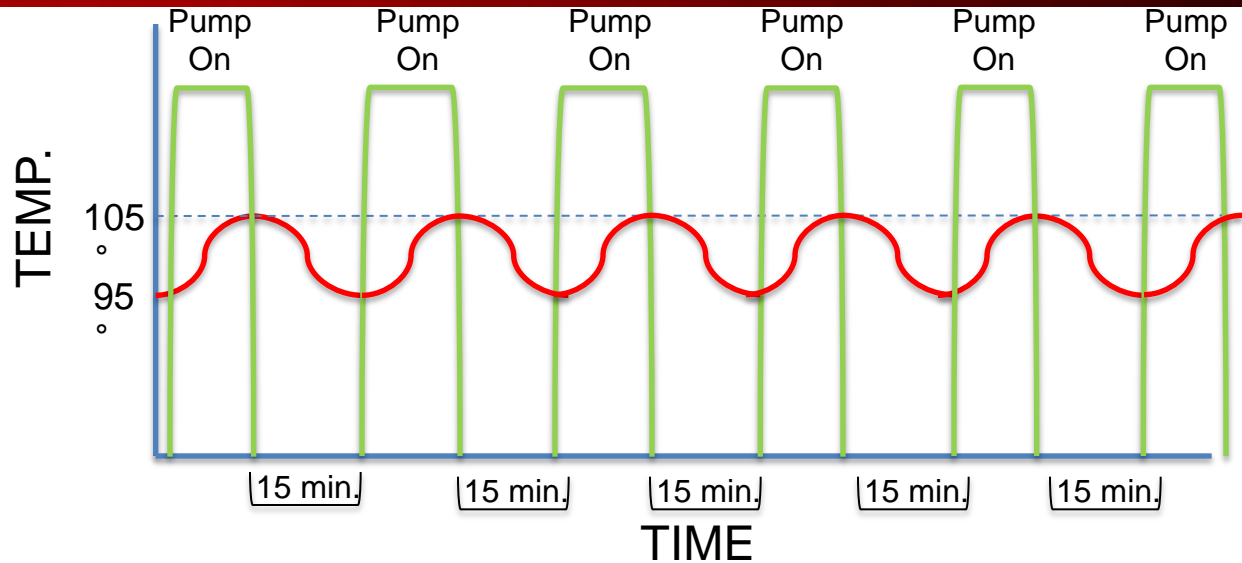

- 6am-9am
- 5pm-11pm

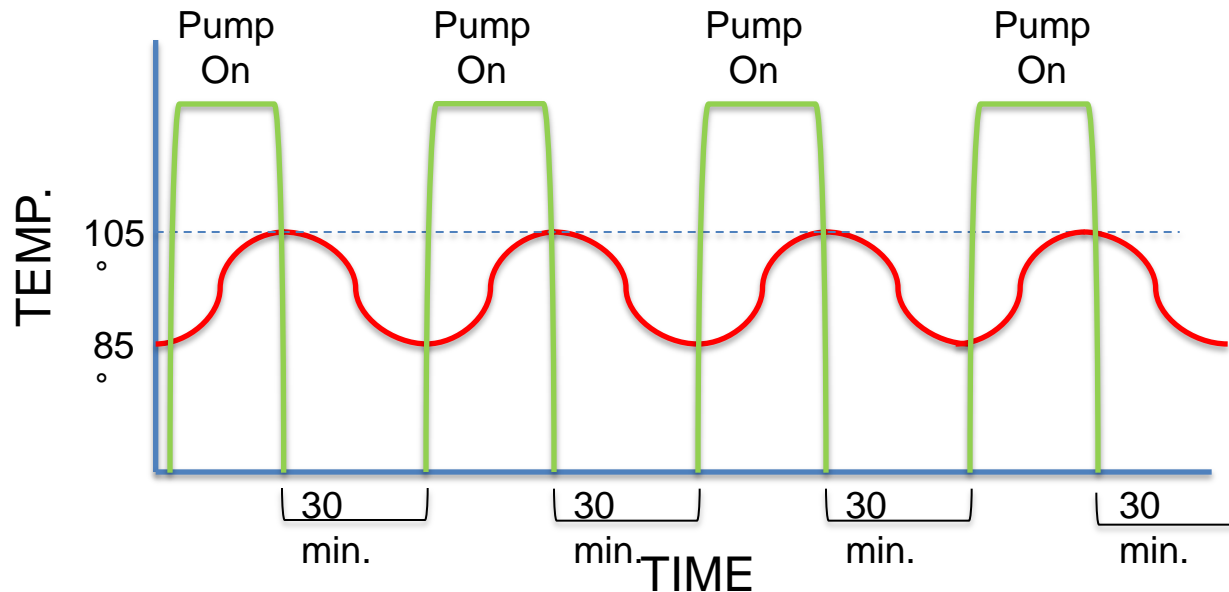

Circ-Logic controls pump on/off intervals during "Recirc ON" periods

# Rinnai Recirc Options

## 1. Circ-Logic

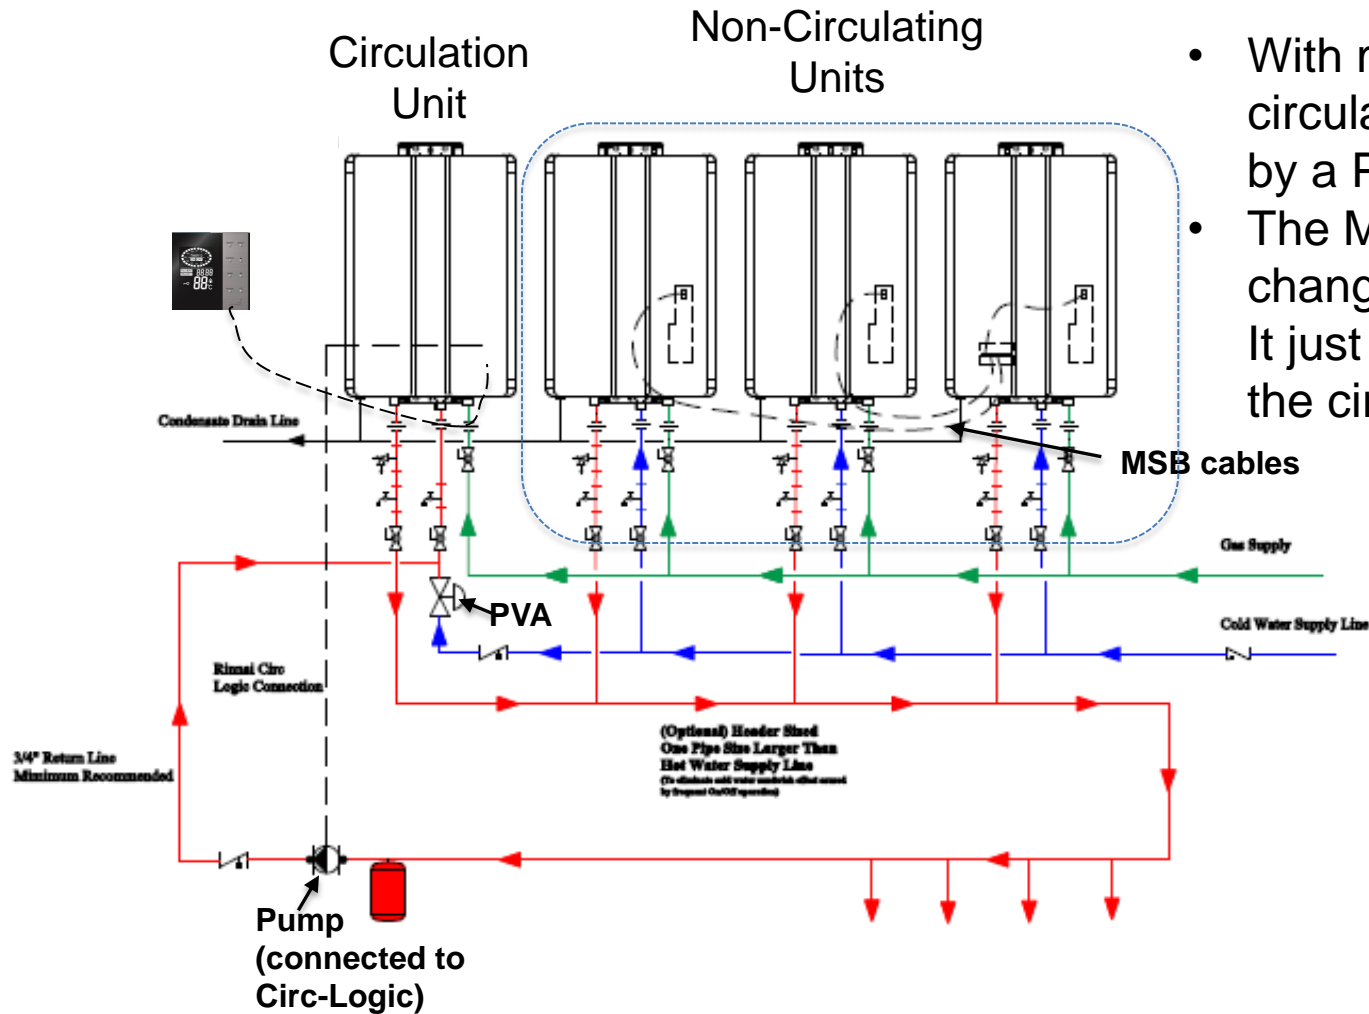

## 2. Circ-Logic + Pump Timer Kit

**Note:** The MC195T should not be used with the GTK15 or any pump with a timer.

# Multiple Units

- With multiple units, the circulation unit is isolated by a PVA
- The MC-195T doesn't change this configuration. It just acts as the timer for the circulation pump.

# MC-195T Price and Availability

- List Price: \$170
- Available: May 1
