Home security just got smarter.

Introducing **Schlage LiNK**. It protects your family, your home, and your schedule. That's because it's more than a lock. It's freedom mounted to your door.

Wish you could unlock your front door without leaving the office?

Life is hectic. Every day is busy. You need more than a lock. You need a system that works with you to monitor your home and your family's safety. That's why there's **Schlage LiNK**. Now you don't have to stay home to stay in control.

Access to home. Access to freedom.

Now, no matter where you go, the front door is within reach. That's because **Schlage LiNK** is more than a lockset. It's a brilliant new way to enhance your home's security, and your family's peace of mind.

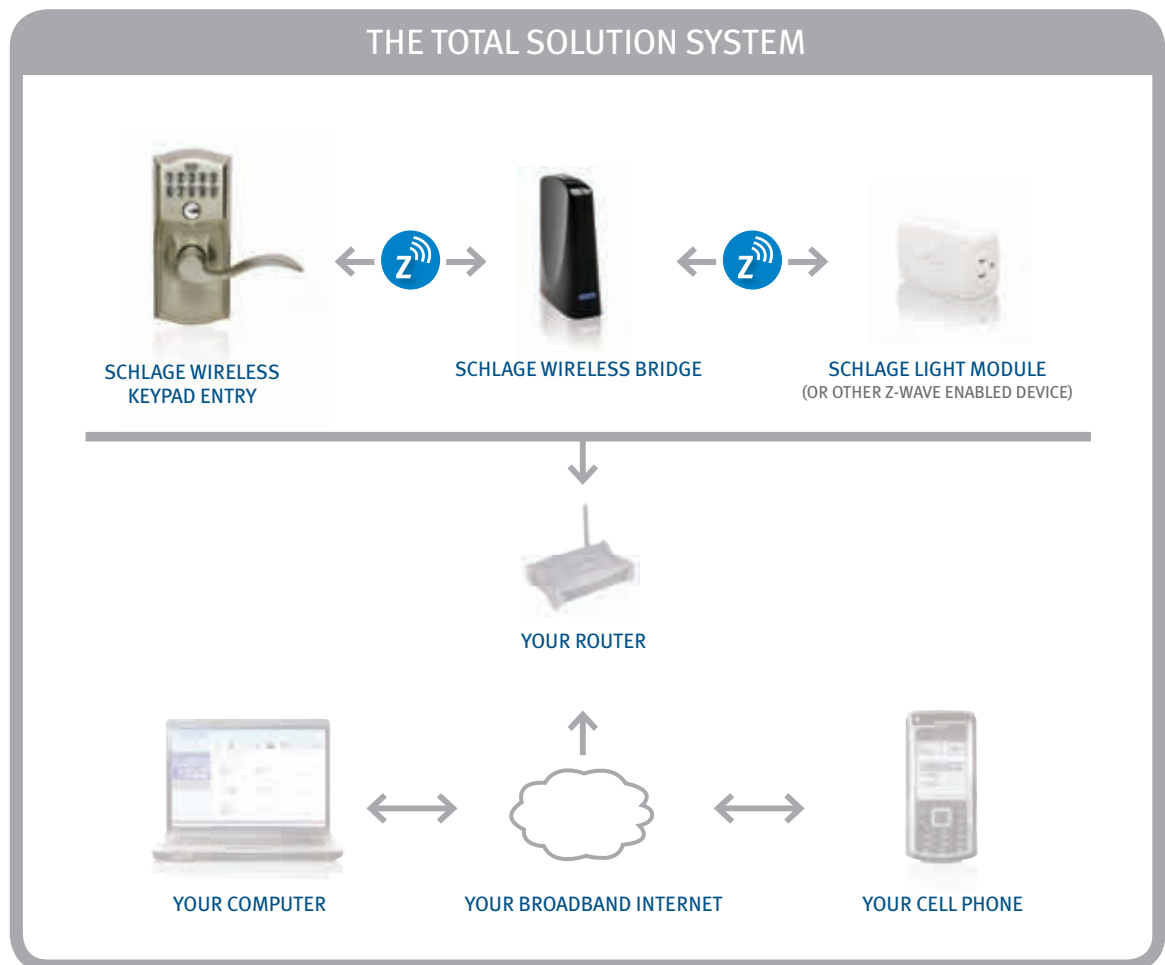

In many ways, **Schlage LiNK** is like our other keypad locks. It uses proven Schlage construction derived from a rich heritage in commercial security. But there's another side to **Schlage LiNK** — one that brings you a whole new level of freedom.

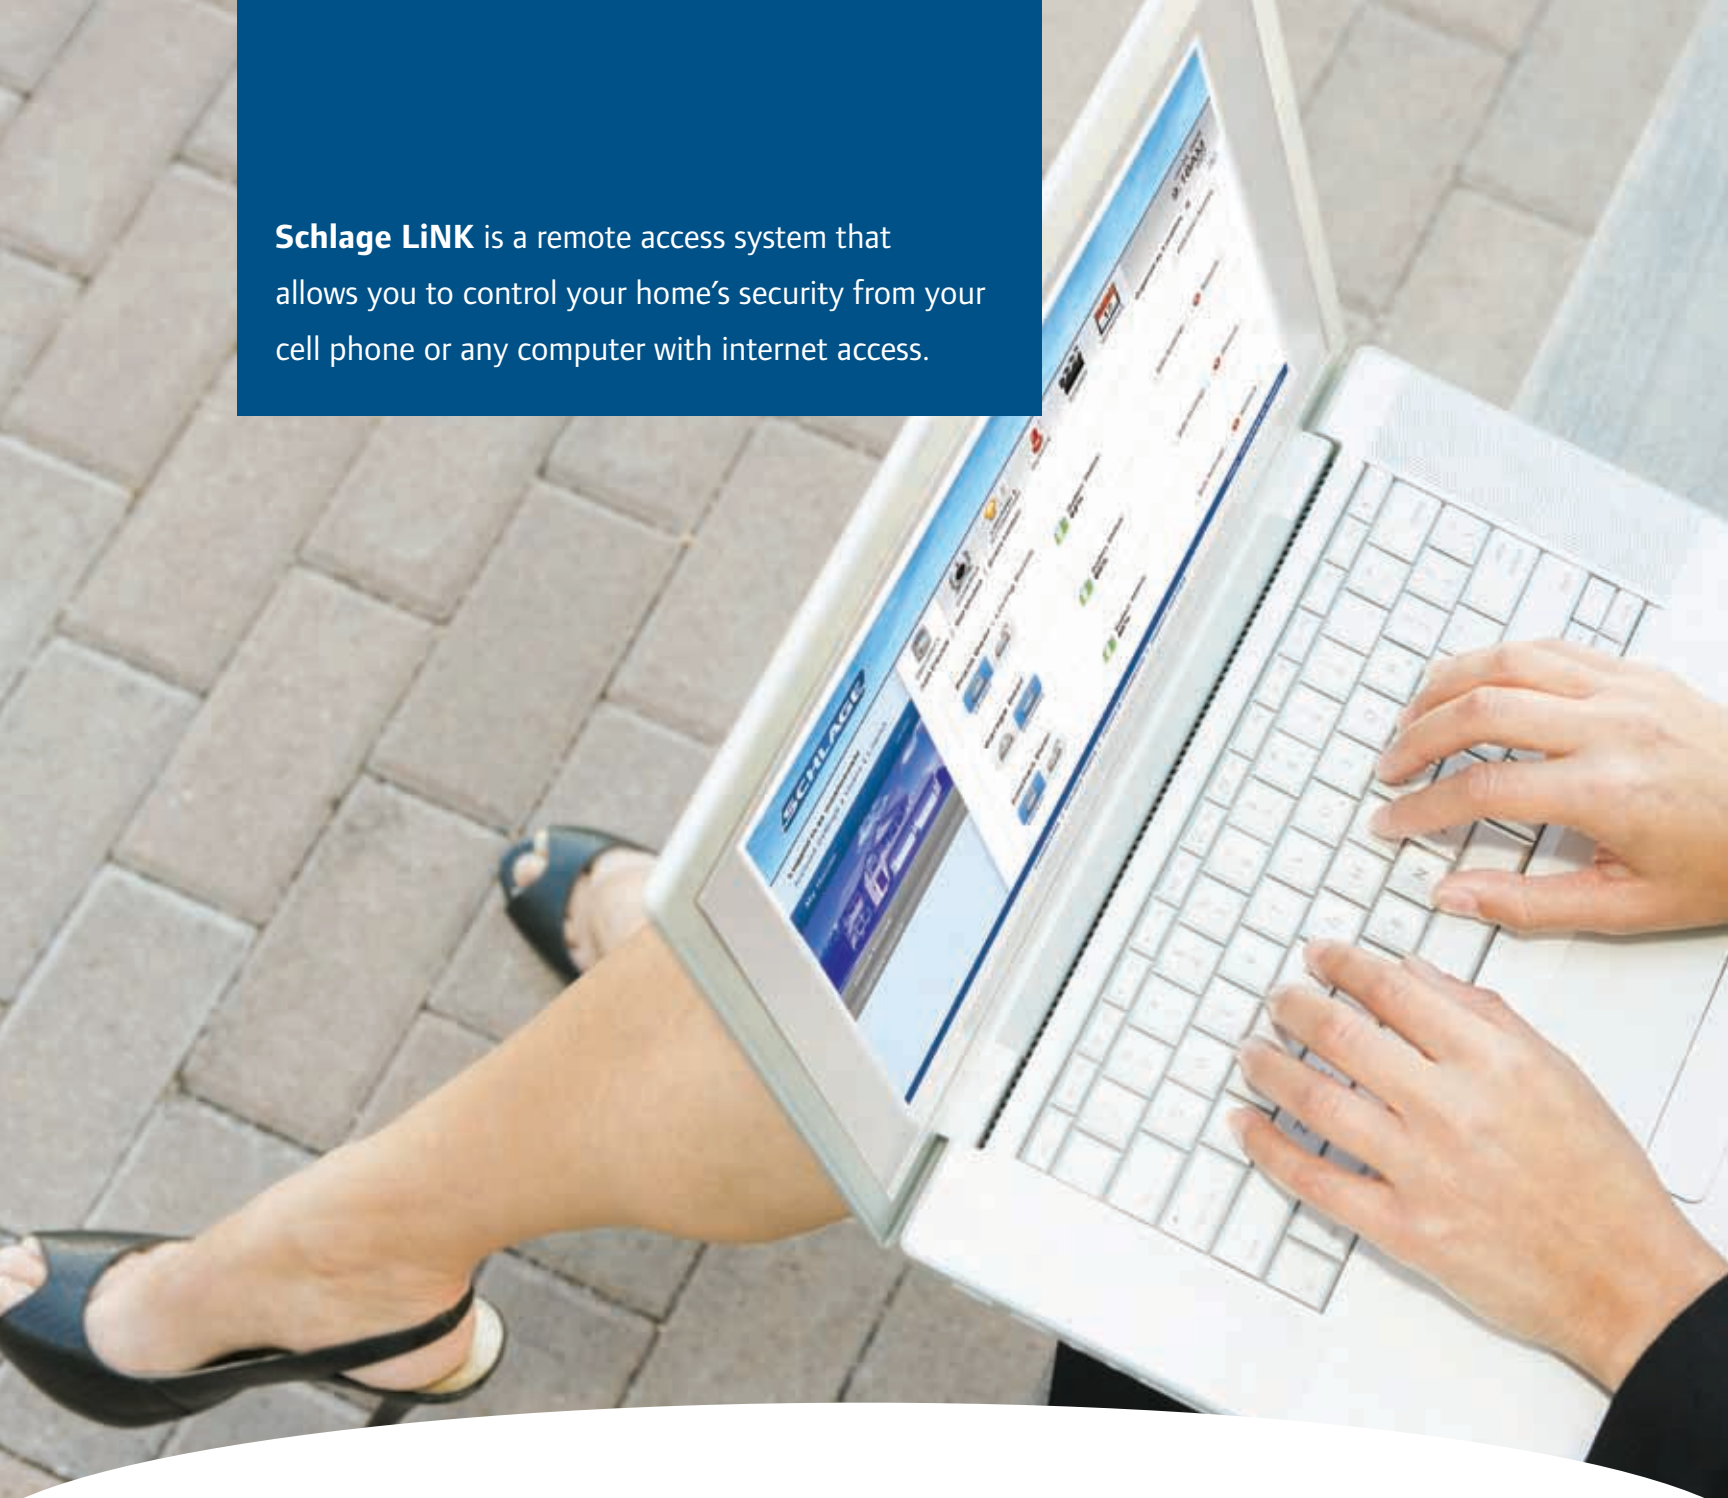

Schlage LiNK allows you to remotely monitor your doors and grant entry to your home. From any computer or cell phone with an internet connection, you can unlock your door, see who's come home and who hasn't, and even receive text message updates from the system.

Schlage LiNK features Z-Wave, an interoperable, two-way RF mesh networking technology.

Learn more about how the components work together on **page 6**.

Schlage LiNK is a remote access system that allows you to control your home's security from your cell phone or any computer with internet access.

Schlage LiNK keeps you in control, even when you're on the go:

- You can easily program **Schlage LiNK** to send automatic text or email updates so you'll always know who's home.
- Installation and set up are simple. You'll be up and running quickly.
- Web-based access means greater peace of mind no matter where you travel.
- **Schlage LiNK** is always on the job, monitoring access to your home around the clock.

The key to real security isn't always a key.

Of course, you don't always need to unlock your door from miles away. That's when **Schlage LiNK's** easy-to-use keypad comes in handy. It's much more convenient than fumbling through your purse or pocket for a key. Simply enter your four-digit code, and open the door.

With **Schlage LiNK's** keypad, you're not limited to preprogrammed numbers. You can choose your own easy-to-remember code, as well as separate codes for each member of your family. Should you ever need to change your code, it's simple.

Schlage LiNK Keypad Locks and Deadbolts:

- Adjust to fit all standard door preparations.
- Are available in a number of attractive finishes.
- Feature a lifetime finish and mechanical guarantee.
- Mean there's no key to hide, lose, carry or forget.
- Are ready to use out of the box. A 9-volt battery is included.
- Allow you to add, change or delete user codes in seconds.
- Install quickly, usually in less than 30 minutes.
- Can be operated by a key (included), if needed.
- Can use up to 19 unique codes.

Enhanced Security Featuring Wireless Encryption

- Anti-pick shield helps to prevent tampering
- Patented latch bolt design provides maximum kick-in resistance
- Full SSL 128-bit encryption
- Similar security used as online banking

Innovative Technology

- Uses Z-Wave Technology
- Automatic battery level notification
- Non-wearing Keypad, lighted for night time use

Easy Installation with Guaranteed Fit

- Replace your existing lock with a screwdriver in less than 30 minutes
- Fits all standard door preparations
- Reversible lever adapts to both right- and left-hand doors

Schlage LiNK Keypad Deadbolts

Rock solid **Schlage LiNK** deadbolts were designed to offer even greater peace of mind. Like standard keypad entry locks, they require users to enter a simple four-digit code and feature

Schlage LiNK's remote access. And because they also feature an ANSI Grade II rating, they're perfect when additional security is needed.

They're smart. They're connected. They're part of a very hip crowd.

Wireless Bridge

This convenient system uses intelligent web-based technology to connect you, your home, and your mobile devices. **Schlage LiNK** brings home real security — and travels with you wherever you go.

Wireless Bridge

Your lockset or deadbolt may be the face of your **Schlage LiNK** system, but the Bridge is what makes it so smart. It's called the Bridge because it's just that — a safe way to connect two things. In this case, it securely connects your **Schlage LiNK** lockset or deadbolt to the internet. The result is two-way communication between you and your doors.

It works like this:

- Through your computer or cell phone, the Bridge receives a signal from your home's wireless network.
- The Bridge sends another wireless signal to the lockset.
- The door unlocks.

The components of your **Schlage LiNK** system, through the Bridge, can also perform many other time saving tasks.

For example, you can:

- Receive emails or text messages when family members come home.
- Unlock the door remotely for kids who forget their codes.
- Allow the handyman to access your home without missing work.
- Add controls to your system for additional components such as a web camera, home appliances, and lights.
- Use the system anywhere you have internet access, even other countries.
- Access a history of who has entered your home.

The **Schlage LiNK** Interface

Schlage LiNK's design is based on the principle that smart technology should make life easier. So even though it utilizes highly advanced engineering, it still boasts a simple and intuitive user experience. It means you don't have to be a techie to appreciate **Schlage LiNK**. But you will appreciate your family's new level of freedom.

A user-friendly interface makes it easy to take advantage of all **Schlage LiNK** has to offer. Simply log on with your computer or internet-enabled phone, and you're in control. With just a few simple clicks you can unlock your door, see who's come home, and even add and delete users codes from nearly anywhere.

Light Module

In some applications a Light Module can be added to expand wireless capabilities. The Light Module amplifies **Schlage LiNK** wireless signals in your home by expanding the system's range.

So no matter how many locksets or other components you add — your **Schlage LiNK** system will operate smoothly.

Light Module

Let **Schlage LiNK** set you free.

- As you expand your system with additional locksets or other Z-Wave compatible items like lamps, security cameras, and appliances, your remote interface will expand, too.
- You don't need a smart phone to access the interface. Any cell phone with internet access will do.
- **Schlage LiNK** is secure. It uses the same encryption used by the banking industry for financial transactions.
- Every function of the **Schlage LiNK** interface is simple. Accomplish every task with just a few clicks.
