TWILIGHT

MR1002

With its bold repetitive motif of metal cylinders and precision-cut square crystal trim, Twilight is a dramatic source of illumination inspired by celestial constellations in the night sky. The vertically aligned cylinders are separated one from the next by single columns of large crystals. Light from the center shines out through elongated oval openings in the cylinders and refracts brilliantly through the crystals. Balancing circular shapes and geometric lines, Twilight is a contemporary design with timeless appeal.
