EASY-TO-FOLLOW INSTRUCTIONS

When building in a Sharp countertop microwave oven, be sure to use the proper Sharp built-in kit. All Sharp kits are UL approved and provide ductwork to assure proper air circulation around the product. Never enclose a microwave oven so tightly that air cannot circulate around it. It will not function properly in a tight enclosure. Prepare cabinet or wall opening to provide access to a separate 3-pronged 120V AC outlet of 15 amps or larger.

Not all microwave ovens can be built-in. Check the nameplate and/or carton of the microwave oven for the correct built-in kit. Please refer to operation manual for installation recommendations. This information is also available at www.SharpUSA.com.
