It is important to note that any natural stone hard surface flooring can become slippery when wet or improperly maintained. Unless specifically stated by Shaw Industries, Inc. the use of Shaw Industries, Inc. natural stone is not recommended for exterior horizontal surfaces.

This product can be used in interior wet areas if sealed and maintained properly. The stone look could be altered if not maintained properly. For information about products that can protect the stone from moisture exposure contact your local Shaw hard surface territory manager.

This product may contain dry seams, pits, fossils and glass veins that are filled at the factory or during installation. These are all inherent characteristics of the stone. Since these veins can sometimes lose their fillings, they should be refilled as part of normal maintenance.

A sealer is recommended for all natural stone products.

Note: Natural stone is a product of nature, hence variations in shade and appearance are inherent. Veining and mineral deposits create unique characteristics per stone. Please consider at the time of purchase... No Two Stones Are Alike! Installation constitutes acceptance.

Premium Grade

Color is true and consistent throughout and represents the truest form of the stone. Little to no veining or surface imperfections are found. Premium Grade offers the most consistent coloration along with the smallest pits.

Select Grade

Majority of the surface is pure with the color remaining relatively consistent throughout the product. Small amounts of discoloration may be seen in a few select tiles. Select Grade offers some color variation and slightly larger pits than Premium Grade.

Classic Grade

Discoloration and imperfections are more pronounced and variation in shading / color exists throughout product. Classic Grade offers high variation from tile to tile and the largest pits.
