SLOAN OPTIMA SYSTEMS Battery Powered Flushometers

Model

Description

Battery Powered, Sensor Operated G2[®] Model Retrofit Conversion Kit for Exposed Closet Flushometers.

Flush Cycle

Model RESS-C 1.6 gpf/6.0 Lpf AND 3.5 gpf/13.2 Lpf

The RESS-C is furnished with two Flush Regulators. The product is shipped with the 1.6 gpf/6.0 Lpf Regulator installed. Change Regulator to convert to a 3.5 gpf/13.2 Lpf flush.

Specifications

Quiet, Exposed, OPTIMA *Plus*[®], Battery Powered, Sensor Operated Closet Flushometer Retrofit Conversion Kit for Sloan **Royal[®]**, **Regal Pro[®]** and **Regal[®]** Flushometers with the following features:

- PERMEX[™] Synthetic Rubber Diaphragm with Dual Filtered Fixed Bypass
- Flex Tube Diaphragm designed for improved life and reduced maintenance
- ADA Compliant OPTIMA Plus[®] Battery Powered Infrared Sensor for automatic "No Hands" operation
- Infrared Sensor with Multiple-focused, Lobular Sensing Fields for high and low target detection
- Latching Solenoid Operator
- Engineered Metal Cover with replaceable Lens Window
- User friendly three (3) second Flush Delay
- Courtesy Flush™ Override Button
- Four (4) Size AA Batteries factory installed
- "Low Battery" Flashing LED
- Infrared Sensor Range Adjustment Screw
- Initial Set-up Range Indicator Light (first 10 minutes)
- Chrome Plated Metal Handle Cap
- Installation Tools provided
- Diaphragm to be molded from PERMEX[™] Rubber Compound for Chloramine resistance

Variations

□ Z Locking Ring for Zurn[®] Flush Valve Bodies

Special Finishes

D PB	Polished Brass (PVD Finish)
GP	Gold Plate (PVD Finish)
BN	Brushed Nickel (PVD Finish)

□ SF Satin Chrome

See Accessories Section and OPTIMA Accessories Section of the Sloan catalog for details on these and other OPTIMA *Plus®* Flushometer variations.

RESS-C shown installed on an existing Sloan Flushometer.

RESS-C units do *NOT* include a Valve Body, Supply Stop or Vacuum Breaker.

ADA Compliant

Automatic

Sloan G2 Optima *Plus*[®] Flushometers activate via multilobular sensor detection to provide the ultimate in sanitary protection and automatic operation. A battery powered infrared sensor sets the flushing mechanism after the user is detected and completes the flush when the user steps away.

Functional & Hygienic

Touchless, sensor operation eliminates the need for user contact to help control the spread of infectious diseases. The G2 Optima *Plus* Flushometer is provided with an Override Button to allow a "courtesy flush" for individual user comfort.

Economical

Sloan installed batteries speed installation and provide years of metered flushing to control the use of water and energy. Batteries can be changed without turning off the water.

Warranty

3 year (limited)

Model **RESS-C**

Description

Battery Powered, Sensor Operated G2[®] Model Retrofit Conversion Kit for Exposed Water Closet Flushometers.

Flush Cycle

Model RESS-C 1.6 gpf/6.0 Lpf AND 3.5 gpf/13.2 Lpf

The RESS-C is furnished with two Flush Regulators. The product is shipped with the 1.6 gpf/6.0 Lpf Regulator installed. Change Regulator to convert to a 3.5 gpf/13.2 Lpf flush.

Control Circuit Solid State

ELECTRICAL SPECIFICATIONS Battery Type

- Solid State 6 VDC Input 8 Second Arming Delay 3 Second Flush Delay
- OPTIMA Sensor Type
 Active Infrared
- OPTIMA Sensor Range
 Nominal 22" 42" (559 mm -1067 mm), Adjustable ± 8" (203 mm)

OPERATION

1. A continuous, invisible light beam is emitted from the OPTIMA *Plus* Sensor.

- Battery Type

 (4) AA Alkaline

 Battery Life
- 3 Years @ 4,000 Flushes/Month
- Indicator Lights
 Range Adjustment/Low Battery
- Operating Pressure
 15 100 psi (104 689 kPa)

2. As the user enters the beam's

OPTIMA

effective range (22" to 42")

the beam is reflected into the

Plus

Window and transformed into

a low voltage electrical

circuit. Once activated, the Output Circuit continues in a

"hold" mode for as long as

the user remains within the

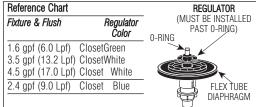

effective range of the Sensor.

Scanner

Sentinel Flush Once Every 24 Hours After the Last Flush

The Flush Volume of the Optima Plus is controlled by the Regulator in the Flex Tube Diaphragm Kit. Regulators are identified by color.

Notes: For a 4.5 gpf (17.0 Lpf)

Water Closet flush, use the EBV-1020-A kit with the White Regulator. Cut and remove the A-164 Flow Ring from the Guide.

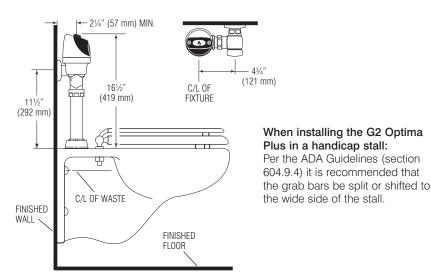

RESS-C G2 Optima Plus valves are supplied with multiple Regulators to address multiple flushing applications. The product is shipped with it's lowest flush volume configuration. To convert the flush to a higher flushing volume, simply change the Regulator.

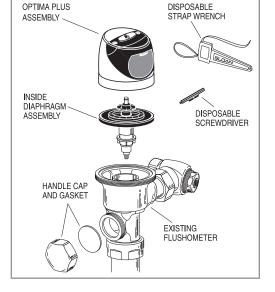

When installing a new Regulator on a Flex Tube Diaphragm Kit, be sure to push the Regulator past the O-ring when Installing. **Note:** Never use more water than needed. Low Consumption water closets and urinals will not function properly on excess water.

3. When the user steps away from the OPTIMA Plus Sensor, the circuit waits 3 seconds (to prevent false flushing) then initiates an electrical signal that operates the Solenoid. This initiates the flushing cycle to flush the fixture. The Circuit then automatically resets and is ready for the next user.
