

Standard Spring Chair Assembly Instructions

- 1.) Place the chair/seat upside down on a scratch free surface. Please note the chair front and back direction is the same as the illustration (A).
- 2.) Put the lower frame/leg on the chair/seat and make sure the lower frame/leg is the same direction as the illustration shows. Loosely attach the lower frame/leg with supplied bolts, lock washers and metal washers (B).
- 3.) Begin to gently tighten all nuts or bolts in succession, never torque one bolt completely as this could make the table wobble. Instead, tighten each bolt slightly, then move to the next in succession until all bolts are securely fastened. Cover all the bolts with bolt caps.
- 4.) Turn the chair upright and put the cushions on it. Now your chair is ready for us.

Warning : Do not force components and over tighten the nuts during assembly.
