

Standard Table Assembly Instructions

- 1.) Place table upside down on a scratch free surface (A).
- 2.) **LOOSELY** attach legs with supplied bolts (B).
- 3.) If applicable, **LOOSELY** attach ring(s) to legs with provided bolts (C).
- 4.) Without moving table from assembly position, gently test stability of table legs.

5.) Begin to gently tighten all nuts or bolts in succession, never torque one bolt completely as this could make the table wobble. Instead, tighten each bolt slightly, then move to the next in succession until all bolts are securely fastened.

Note: Extruded Aluminum may give and bend, so slight, but firm pressure can be applied during assembly, with caution.

Warning: Do not force components and over tighten the nuts during assembly.
