If your outlet box has a ground wire (green or bare copper), connect the fixture's ground wire to it. 8. Install the back plate(D) with mounting plate(A) by using mounting screws(C).

FINISHING THE INSTALLATION (Fig. 4)

9. To prevent moisture from entering the outlet box and causing a short, use clear silicone sealant to outline the outside of fixture back plate (D) where it meets the wall leaving a space at bottom to allow moisture a means to escape.

Your installation is now complete. Return power and test the fixture.
