AC1192LED FIREFLY

SELLING POINTS : Micro-Texture Glass. Now in LED!

CLASSIFICATION : There are many charming stories and myths about fireflies (or lightning bugs if you prefer), but this is about light, not myth. Fireflies flash their lights in patterns, trying to perfect their best come-hither pattern. This seemed like a good jumping off point for a bathroom light design. Our special Micro Texture glass and the slotted bent metal insets suggest the twinkling patterns of the eager fireflies. And all the while, the two prongs holding the glass beckon you in for a closer look.
