# ASSEMBLY AND INSTALLATION INSTRUCTIONS

P0151 / P0152

## WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER WHILE INSTALLING OR SERVICING THIS FIXTURE.

NOTES: 1. Before installing, consult local electrical codes for wiring and grounding requirements.

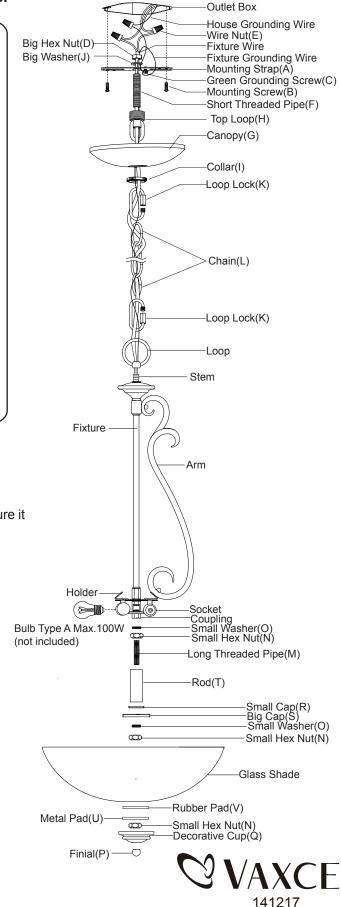

### **Installation Steps**

#### Turn off the power at fuse or circuit box.

- 1. Attach the short threaded pipe to the mounting strap, then secure it with a big washer and big hex nut.
- 2. Attach the mounting strap to the outlet box by using two mounting screws.
- 3. Secure the top loop to the short threaded pipe.
- 4. Secure the loop onto the stem of the fixture, thread fixture wires through threaded end of loop first.
- 5. Connect the chain:
  - Determine length of chain needed to achieve desired fixture height. (To remove excess chain section, use pliers to bend link open.)
  - Weave the fixture wires and fixture grounding wire through the chain, collar and canopy.
- 6. Connect one end of the chain to the loop using a loop lock.
- 7. Connect the other end of the chain to top loop by using the other loop lock.

- 8. Thread the fixture wire and fixture grounding wire through the top loop, short threaded pipe and mounting strap.
- 9. Pull out the source wires from the outlet box. Make wire connections using wire nuts as follows:
  - ---Connect the smooth-coated wire (marked) from the fixture to the black wire from the power source.
  - ---Connect the ribbed-coated wire (unmarked) from the fixture to the white wire from the power source.
  - ---Attach the fixture grounding wire to the mounting strap with the green grounding screw. Then connect it to the house grounding wire with a wire nut.

Carefully put the wires back into the outlet box.

- 10. Attach the canopy to the mounting strap by inserting the top loop, then secure it with the collar.
- 11. Attach long threaded pipe to the coupling of the socket, and secure it with a washer and hex nut.
- 12. Install bulbs (not included). See relamping label at socket area or packaging for maximum allowed wattage.
- 13. Slip the rod, small cap with the open side facing upward and big cap with the open side facing downward up through long threaded pipe, secure them with a small washer and small hex nut.
- 14. Slip the glass shade up through long threaded pipe and secure it with a rubber pad, metal pad and hex nut. Slide the decorative cup up to glass shade, and secure it with the finial.

Turn on the power at fuse or circuit box.

#### The following parts are available for re-order if damaged or missing.
