

# Guardian Mount Instruction

**Step 1: Thread the Fixture onto the Guardian Mount and secure it. Mark the spikes location after locating the point of installation.**

**Step 2: Take the Fixture out from the Guardian mount. Mount the stake by placing a piece of wood on the stake and hammering the wood. Hammer until the bottom of the ring is flush with the ground. Screw the fixture back onto the Guardian Mount, leading the wire from the fixture through the hole of Guardian Mount.**

**Note: Do not attempt to push the Fixture along with the Guardian Mount into hard soil. This may cause damage to the fixture.**
