

## INSTRUCTIONS: LED BUTTON LIGHTS

### MODEL: HR-LED-COV

#### CAUTION :

1. HR-LED-COV is used when upgrading WAC halogen or xenon button lights to LED.
2. HR-LED-COV allows the HR-LED85 to fit in a pre existing 2 3/8" diameter hole.
3. The decorative cover piece is not needed for recessed mounting, and may be discarded.
4. Run the wire through the back hole in the HR-LED-COV cover and push the fixture into the HR-LED-COV cover.
5. Feed the fixture wires through the hole, and connect to wires from the Power Supply with connector.
6. Compress the springs on either side of the HR-LED-COV cover and insert into the opening.
