	Item #:		
	Project:		
	Qty:		
	AIA#:		
	Features		
	Stainless steel interior with stainless steel exterior front and sides		
	Refrigerant flow is controlled with thermostatic expansion valve		
	Unique "ducted" air distribution system		
	 Solid state digital controller with temperature alarms and LED display (Fahrenheit or Celsius) 		
	 Cabinet and doors are insulated with 2-3/8" of CFC free, foamed in place polyurethane 		
	 Stainless steel exterior and interior door come standard with locks 		
	 Exclusive stepped door design to protect recessed door gasket 		
)	 Spring assisted self-closing doors with stay open feature 		
	 Sturdy 8 gauge stainless steel hinge plate with welded hinge pin 		
	• Extruded aluminum flush mount door handle		
	• Field reversible doors (with optional kit)		
	• Evaporator coils are epoxy electrocoated (E-Coat) to help fight corrosion		
	 Energy efficient automatic hot gas condensate evaporator 		
	Stainless steel shelf supports		
	• (3) epoxy coated wire shelves per section are standard		
	 Standard with 4" factory installed casters (three with brakes) 		
t)	 Stackable (two units high) to conserve warehouse floor space 		
	• Three years parts and labor warranty		
	• Five year compressor warranty		
	• 8 ft. cord and plug		

Printed in the U.S.A.

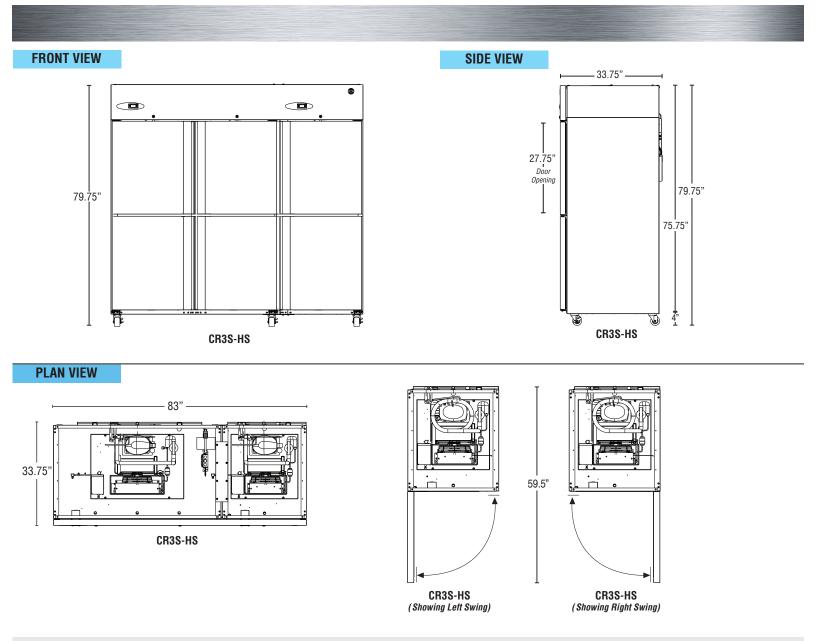

Hoshizaki reserves the right to change specifications without notice.

CR3S-HS 02/11/16 Item # 13379

Cabinet Construction

The exterior cabinet front, and sides, are constructed of high quality stainless steel. The exterior top, back, and bottom are constructed of coated steel. The cabinet interior is constructed of stainless steel with a unique "ducted" air flow system. Three (3) heavy duty epoxy coated shelves per section are standard. Mounted on stainless steel pilasters shelves are adjustable in 1" increments. Cabinet walls and doors are insulated with 2-3/8" of environmentally friendly, CFC free, foamed in place polyurethane. An interior light is automatically activated when doors are opened. 4" factory installed polyolefin casters (three with brakes) are standard.

Door Construction

Doors are constructed of a high grade stainless steel exterior and interior and are standard with locks. Hoshizaki's exclusive "stepped" design protects the recessed gasket while product is being removed from the cabinet. Doors are provided with a one piece, full length extruded aluminum flush mount handle and are mounted on eight (8) gauge stainless steel hinge plates with a welded hinge pin. Spring assisted self-closing doors are equipped with a stay open feature past 90 degrees. Snap-in magnetic door gaskets are easily removed for cleaning. Door hinging is field reversible (with an optional door reversal hinge kit).

Refrigeration System

The high efficiency refrigeration system is self-contained with an epoxy electrocoated (E-Coat) evaporator for extended life. Top mounted refrigeration system is easily accessible for service. The refrigeration system components are assembled on a high density expanded polypropylene platform that is removable from the main unit. A unique ducted air flow system achieves uniform air distribution within the cabinet to eliminate hot spots. Condensate removal is accomplished with an energy efficient non-electric evaporation system. A thermostatic expansion valve (TXV) controls the flow of environmentally friendly R-134a refrigerant through the evaporator. Refrigeration system utilizes a heated defrost to eliminate any ice on the evaporator coil. Solid state digital controls monitor the operation and performance of the refrigeration system. The controls also provide visual high and low temperature and high and low voltage alarms. A LED display shows the cabinet temperature and is adjustable to Fahrenheit or Celsius. 115 volt units are equipped with an eight foot cord and plug (20.0 amps or less).
