#### **Required Electrical Service**

	ed, protected with Class A terrupter (GFCI) or Earth-Leakage :
Pump/control	220/240 V, 20 A, 50/60 Hz

#### **Installation Notes**

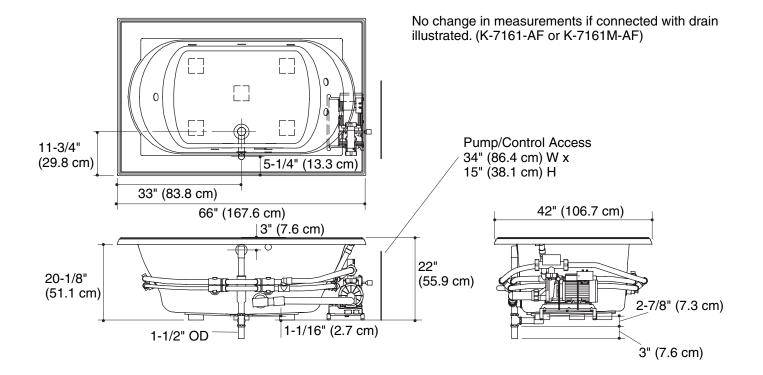

Install this product according to the installation guide.

Floor support under whirlpool must provide for a minimum of 44 lbs/square foot (212 kg/square meter) loading.

Hot water supply should be 70% of capacity or greater. Installations will vary.

If installing a rim-mount faucet, make sure there is no interference with drain overflow and circulating system before drilling any holes. Consult local and national codes for minimum air gap requirements if installing a spout on the faucet deck.

This whirlpool is designed for drop-in installation only. It is not suited for use in a three wall alcove with an overhead shower.
