## **Technical Information**

Fixture:		
Configuration	two-piece, elongated	
Water per flush	1.6 gpf (6.0 lpf) or 0.8 gpf (3.0 lpf)	
Passageway	2″ (51 mm)	
Water area	4-1/2″ (114 mm) x 5-3/4″ (146 mm)	
Water depth from rim	8-1/2" (216 mm)	
Seat post hole centers	5-1/2" (140 mm)	
Included components:		
Bowl		K-4322
Tank		K-4419
Tank cover		1052066
Push buttons		1035417

## **Installation Notes**

**IMPORTANT!** The rough-in must be 12" (305 mm) or more from the base of the wall or baseboard. The base of the toilet fits tightly against the wall or baseboard. The toilet will not fit correctly if there is less than 12" (305 mm) of clear space between the base of the wall or baseboard and the centerline of the outlet. Install or relocate the supply and outlet as necessary to conform to rough-in dimensions.

**NOTE:** If a baseboard causes the rough-in to be less than 12" (305 mm), it must be cut or removed to allow space for the toilet.

If this toilet is installed in new construction, install a new supply stop following the dimensions in the diagram.

In installations with the supply stop installed, the existing supply stop may need to be relocated if it is less than 8-1/2'' (216 mm) from the centerline of the toilet. Dry fit the toilet to confirm if the supply stop needs to be relocated.

The supplied hose will extend roughly 6'' (152 mm) from the toilet. If the supplied hose does not reach the supply stop, a longer supply hose may be used.

For back-to-back toilet installations: Use only a  $45^\circ$  double wye fitting.
